This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

LETTER OF TRANSMITTAL.

DEPARTMENT OF LABOR,
Washington, D. C., December 31, 1888.

SIR: I have the honor to submit herewith my fourth annual report. This report properly belongs with the series emanating from the Bureau of Labor. By law the Bureau of Labor ceased to exist, practically, on the 30th of June last, the Department of Labor having been created by an act approved June 13, 1888. The investigation on which this report is based was made by the Bureau of Labor. As a part, therefore, of the work of the Department of the Interior, and as material constituting a part of your annual report for the fiscal year ending June 30, 1888, it seems proper that I should transmit this report to you, and in doing so I desire to thank you for your courtesy at all times in aiding me to forward the work of the Bureau of Labor. Your kindness and that of your predecessors has been of great assistance in performing the duties assigned to the Bureau of Labor. All future reports, of course, will come from the Department of Labor, and by law will be transmitted to Congress. While the material for this report was collected prior to the close of the last fiscal year, much other work was done by the Bureau which must naturally be carried forward into the reports of the present and the coming fiscal years. I can not, therefore, strictly say that the present report constitutes the operations of the Bureau of Labor for the fiscal year ending June 30, 1888. The special work called for by Congress relating to the statistics of marriage and divorce does not form a part of the annual report, but by law is to be presented to Congress as a special matter. This work relating to marriage and divorce has been carried through, so far as the field-work was concerned, by the Bureau of Labor, under your administration, and your liberal construction of law and hearty coöperation have enabled me to make an exhaustive report relating to one of the most vital questions connected with the social affairs of the country.

In all this work I have had the assistance of Mr. Oren W. Weaver, who has been the chief clerk of the Bureau from its organization, and who continues as chief clerk of the Department of Labor.

I am, very respectfully, your obedient servant,

CARROLL D. WRIGHT,
Commissioner.

Hon. WILLIAM F. VILAS,
Secretary of the Interior.

WORKING WOMEN IN LARGE CITIES.

INTRODUCTION.

The object of the investigation now under consideration was to secure information relative to the condition of working women in our large cities. By working women is meant that class of women who earn their living in the occupations calling for manual labor. The professional and semi-professional callings, like those of teaching, stenography, typewriting, telegraphy, etc., have not, as a rule, been recognized in the investigation. Nor have women employed in textile factories been included, except incidentally, as various investigations have already been made relative to the condition of women and men in such establishments. Moreover, textile factories are not usually situated in large cities, and the special object of this study has been to discover what *cities* have to offer women in the way of manual labor. Therefore those women who work in great city manufactories upon light manual or mechanical labor and in stores are the ones that we recognize under the popular term "working women."

This study comprehends three hundred and forty-three distinct industries out of the large number now open to women. It is, therefore, thoroughly representative, so far as kinds of work are concerned. It relates to twenty-two different cities, as follows:

Atlanta, Georgia.	Cleveland, Ohio.	Richmond, Virginia.
Baltimore, Maryland.	Indianapolis, Indiana.	San Francisco, California.
Boston, Massachusetts.	Louisville, Kentucky.	San José, California.
Brooklyn, New York.	Newark, New Jersey.	Saint Louis, Missouri.
Buffalo, New York.	New Orleans, Louisiana.	Saint Paul, Minnesota.
Charleston, South Carolina.	New York, New York.	Savannah, Georgia.
Chicago, Illinois.	Philadelphia, Pennsylvania.	
Cincinnati, Ohio.	Providence, Rhode Island.	

These twenty-two cities, with the exception of San José, in California, must be considered as thoroughly representative, so far as locality is taken into account. San José was allowed to remain in the tables, for without it San Francisco would have been the only Pacific Slope city comprehended. The investigation is representative so far as the number of women whose affairs enter into it is concerned. The total number of such is 17,427, being from 6 to 7 per cent. of the whole number of women engaged in the class of work coming under observation in the cities named.

The tables show a wide range, the facts having been obtained from all grades within the range designated, and the agents of the Depart-

ment have carried their work into the lowest and worst places in the cities named, because in such places are to be found women who are struggling for a livelihood in most respectable callings, living in such places as a matter of necessity, since they can not afford to live otherwise; the women, however, who prefer the slums, but who are not legitimately to be classed with the working women, are not included in this investigation. In a future report their condition and surroundings will be fully and carefully considered.

The facts which enter into this report have, in the main, been collected by women, agents of the Department. The only exception in this respect has been for places in California and the information relating to prostitution. The result of the work of the agents must bear testimony to the efficiency of the women employed by the Department, and to the fact that they are capable of taking up difficult and laborious work. They have stood on an equality in all respects with the male force of the Department, and have been compensated equally with them. It was considered entirely appropriate, in an investigation of the kind, that the main facts should be collected by women. The wisdom of this course has been thoroughly established.

It is difficult to gain information from people who are working for a living under the most favorable conditions, but when this information is sought for in the walks of life comprehended by this report the difficulty is vastly increased. The facts, however, have been obtained successfully, and the women who have obtained them have been obliged to interview individually the 17,427 women who have contributed the facts relating to their lives for this report.

CHAPTER I.

GENERAL CONDITIONS.

CHAPTER I.

GENERAL CONDITIONS.

One of the instructions to the agents when starting in upon the work committed to their hands was that they should note the general surroundings so far as the city in which they were collecting information was concerned. The results of this instruction are herewith presented, taken from the reports of the agents. Of course no attempt was made by them to make an elaborate and exhaustive report upon all the social and industrial features of each city visited, but simply in a general way to give what most impressed them relative to the city surroundings of the women of whom they sought information. These impressions are therefore given for each city consecutively.

Atlanta.—No better type of the New South could be selected than Atlanta. Manufactures of all descriptions are springing up, and one necessitates another. The large patent-medicine industry caused the establishment of glass works; bag manufacturers found it cheaper to make than to buy their material, and opened a cotton mill; and such reciprocal interests are numerous.

More working people own homes than in any southern city visited in the course of this investigation. Rents are cheap, especially in the suburbs beyond the limits of city taxes; but the children of families who live beyond the city limits are not admitted to the city schools, and as the educational system of the country is inefficient, great illiteracy exists among the working girls. Their moral condition also leaves much to be desired.

The cost of living is comparatively high, owing to the fact that Georgia farmers generally raise only cotton and buy their food. Meats, fruits, grains, butter, etc., are largely brought from other states. Wages, except in the dry goods stores, are generally low. In some stores the women receive 80 per cent. as much salary as the men clerks. The most kindly sentiments exist between employers and their employés. Many shops possess no accommodations whatever for the comfort of the girls employed. With the erection of better business blocks these evils will doubtless be remedied, the employer being considerate of the women he employs. Great complaint is heard, however, of the incompetence and shiftlessness of the girls, of their inability to learn to do fine work, of their unreliability and absenteeism. Some manu-

facturers, being discouraged by this class of help, have gone elsewhere. Northern women imported for dressmaking or millinery receive more than double the pay of the native-born.

Baltimore.—The home condition of Baltimore's working women is decidedly above the average. Rents are very cheap, the majority of the working people's homes are separate houses, and the sanitary arrangements are good. Blocks of tenement houses, while not numerically infrequent, are, compared with other cities, rarities. The general impression, gained from repeated visits to all parts of the city, was that of roomy and comfortable separate houses. The markets are excellent, and the cost of living is low, food and clothing being almost as cheap, comparatively, as house rent.

As to their educational, moral, and religious condition, there is great variation among the women here as elsewhere. The saleswomen are, as a class, superior in education and manners to any in the United States; girls in other industries not above the average. The girls are an orderly and church-going class, and exhibit considerable thrift. The public libraries, free lectures, and the public parks afford advantages for instruction and recreation. The shop conditions are not by any means so favorable. Few of the manufacturing establishments of the city were constructed with a view to their present industrial uses, many being converted dwellings, stores, or warehouses, and consequently ill-adapted for use as factories. There are a few exceptions, but these only serve to emphasize the rule. Many of the stores are fine structures, provided with proper ventilation, light, toilet facilities, and fire escapes, and the treatment of the employés in these stores of the better class is almost uniformly good and kind. Wages are not high in Baltimore, but the cost of living in all its branches is so moderate that the city may well be considered as affording unusual advantages to working women.

Boston.—The most striking feature of the home life of working women in Boston is the great number who live in lodging houses. This is especially noticeable because of the large number of girls coming from the surrounding country places and from the British provinces. These, having usually few or no kindred in the great city, are forced into the lodging houses which abound, for comparatively few private families will receive boarders, and the working girls' homes, though becoming more numerous than formerly, are still entirely inadequate to provide for all these homeless strangers. Such conditions necessarily weaken the hold of the home life upon the memory and the affections; they do away with the sense of proprietorship which even the poorest tenant feels in the house which shelters him; and they also do away with that privacy which is one of the best features of the separate home.

Space being valuable, there is sometimes no parlor or reception room attached to the lodging house of the working girl, and she is forced to receive her friends in her chamber or not to receive them at all. Such a condition tends either in the direction of crushing out social inter-

course, especially between the sexes, or of carrying it beyond the limit of prudence. Yet there are some compensations for this cheerless home life, if home life it may be called, and these are found in the proprietorship which the working women may have in the intellectual life of the city, in its educational privileges, in its libraries, museums, and exhibitions. Music, literature, art, lectures, are all within easy reach, and the working girls of Boston avail themselves of such privileges to a great extent. A button-hole maker gave as her reason for not living in the suburbs, where living was cheaper, that she would then be debarred from lectures, concerts, and oratorios. A necktie maker contributes excellent verses to a first-rate magazine. Suspender makers, who have taught school, belong to Browning clubs, and discuss the tariff and similar vital issues. Work is regarded as honorable, and the barriers which exist between people of leisure and wage earners may in some cases be overcome.

The shops and factories are in fair sanitary condition in a majority of cases, and in very many the employers seem anxious to add to the comfort of their employés. The factory laws are more generally posted, and as regards the employment of children under age, more generally observed here than elsewhere. The work is, generally speaking, quite regular during the entire year. Many rumors were heard of improper proposals being made to girls when applying for work, or entering thereon, but such rumors were generally found to be groundless, only one authenticated case of the kind having been discovered in the investigation.

Brooklyn.—Though not so crowded as New York, the life conditions in Brooklyn are almost as hard. Whole streets and districts of tenement houses are given over to poverty, filth, and vice, the sanitary and moral unwholesomeness of which is manifest. Better homes distinguish the districts remote from business centres, but the great distance of these homes is a tax as to hours and car fare. Model tenements and improved apartment houses are to be found, and ownership of the house is frequent. Rent is cheaper than in New York and the commodities of life a shade less dear.

The moral conditions, in general, vary from the best to the worst, but respectability and education are greatly in the ascendant.

A large number of Brooklyn girls work in New York, pay being higher than in Brooklyn and the industries more diversified. The making at home of clothing for the New York shops is universal in the suburbs of Brooklyn, though at prices on which no woman could live were there not other workers in her family.

Some occupations in Brooklyn involve great risks to girls, the loss of joints of fingers, the hand, or sometimes the whole arm. There is a growing public demand for shorter hours, half holidays, and equal pay to women with men for equal work.

Buffalo.—The prosperity of the laboring classes in Buffalo is apparent to the most casual observer. Private houses are the rule, more than

one family in a house the exception. The residences are neat and attractive, often embowered in flowers and vines, and comfortably furnished, with sanitary conditions unusually good. As naturally follows, the cost of living is reasonable; coal is cheap, and markets abundant.

Ninety per cent. of the working girls live at home, and a large proportion will work for small pay, needing money only for dress or pleasure. This cause contributes, with others, to make wages low. The girls are of average intelligence. In the patent medicine establishments, some bookbinderies and stores, the deportment and language of the employés are such as bespeak refinement and education. The standard of morals is good, and religious observances are strictly followed. No one industry is of such magnitude as to take precedence. The employment of women in shops being of rather recent date, many of the work rooms are ill-adapted to their present use. Complaints of oppression and injustice are rare. Even at ready-made clothing, the worst paid industry, girls sometimes save money.

Charleston.—In no other southern city has the exclusion of women from business been so rigid and the tradition that respectability is forfeited by manual labor so influential and powerful. Proud and well-born women have practiced great self-denial at ill-paid conventional pursuits in preference to independence in untrodden paths. The embargo against self-support has to some extent been lifted, and were there more occupations open to women the rush to avail themselves of them would show how ineffective the old traditions have become. The special feature, then, of Charleston shops is the well-born, well-educated girl side by side in the least attractive pursuits with the "cracker." They are religious and respectable, and receive from their employers the consideration due to good conduct and efficiency. Pay is small for men, and naturally lower for women; hours of labor are not excessive, and shop conditions are favorable. The dressmaking industry, elsewhere the special sphere of working girls, is conducted almost wholly by colored women. The few manufactures which exist are mainly due to the enterprise of foreigners, the native-born citizen not always having the means to develop the resources of his city.

Chicago.—The tenement house system is largely engrafted on the life of Chicago. The houses, however, are rarely in long blocks, often have light and air on four sides, and seldom contain more than six families. Two or three families living in a separate house is the general rule, and often each family has a single home. The sanitary condition of houses and streets is bad, but these evils are being remedied by the vigorous action of the health department. Rents are high, the markets inconvenient, and the cost of living greater than in any other western city. There is a large foreign element in Chicago, which furnishes a rough class of girls, sometimes unfamiliar with the English language, and again speaking it fairly. Habits of economy do not prevail among the working classes, and there are cases of poverty as extreme as in New York.

Wages are higher than in the East, and expert workers scarcer. Even employments requiring no skill command pay enough to render girls independent; if displeased they leave on the slightest pretexts, and the employer must fall behind his orders or hire whom he can get. Workwomen are always in demand, and as a rule employers make no requirements as to good character. Notwithstanding the indifference of proprietors the general morality in most callings is surprisingly good.

In order to prevent absenteeism and to insure prompt attendance, the employers have adopted an oppressive system of fines. Bad work also occurs so often that fines are imposed for this cause. As a result the working women are inclined to be antagonistic to employers, and discontent is more outspoken than in the East, where work is scant and competition strong.

The sanitary condition of one or two large shops is worse than any visited elsewhere during this inquiry. In the new establishments the ordinary provisions are made and gross neglect is rare.

Cincinnati.—The percentage of working girls living at home is higher in Cincinnati than in any other city visited in the course of the investigation, but the homes are unusually uninviting, even in the newer quarters. The streets are dirty and closely built up with ill-constructed houses, holding from two to six families. Many poorer parts of Cincinnati are as wretched as the worst European cities, and the population looks as degraded. Rents are disproportionately high and commodities dear. German food and drinks are largely consumed, and continental customs prevail. Sunday concerts and dance halls are more popular than the churches. Too many young children are employed in the work shops, and illiteracy is not infrequent even among the native-born.

Labor organizations are a striking feature of Cincinnati, especially in two of the larger industries—boot and shoe making and cigar making. The Hannah Powderly Assembly, K. of L., numbered over 1,100 women at the time of this inquiry, and practically controlled the shoe trade, but since then its power and influence have declined. The workers at this branch are intelligent and respectable. Some shoe factories are commodious and handsome, but in these, as well as in the cigar factories, the sanitation is defective.

The system of fining works great hardship among the shop girls, and petty regulations hamper their freedom. Wages and the moral tone of the shops are not high. Diversity of occupation is considerable, but the skilled worker is rare.

Cleveland.—To the mass of Cleveland's working girls labor is less a necessity than a means of outside income. The large iron, coal, and oil interests of the city give employment to thousands of men who are able to maintain their families, yet whose daughters are self-supporting or partially so.

Separate houses, good sanitation, comfortable surroundings, and general respectability are the rule rather than the exception, and extreme poverty is rarely witnessed.

Living is cheap, and the markets are good. Schools and churches are numerous and well attended. The working girls are less worldly and extravagant than in larger cities, less dependent on excitement, less alert and knowing, and consequently seem slow and dull in comparison; but the slowness is respectable and the dullness good.

The work rooms as a rule are comfortable, and many are even luxurious. Lack of proper ventilation is very common, but in other respects no striking defect is generally noticeable. There is a great diversity of industries in Cleveland, and women are employed in occupations unusual for the sex, notably in nail and tack factories, bolt, nut, and screw works, which are sometimes badly located and arranged. Wages are low. Fines and strict rules are so unusual that the mention of them to the girls was greeted with great surprise.

Rough girls are found in every calling and in every city, but their number in Cleveland is below the average, and in the large cloak factories the average of intelligence and morality is high. Tidiness and decorum are general.

Indianapolis.—Nine-tenths of the working girls of Indianapolis live at home. The suburbs of the city contain a great number of cottages of from two to six rooms each, and these are the usual homes of the working people. Many of these homes are owned by those who occupy them. As a rule these houses are neat and comfortable. Rents are moderate, and as the city is situated in the midst of a farming and grazing country, the markets are abundantly supplied with cheap and varied food.

There is little poverty among the inhabitants, and the worst streets seem neat and desirable compared with the crowded quarters of larger cities.

Educational facilities are ample, and churches are numerous, though church affiliation among the working girls is not so marked as in some other places. The working girls are largely native-born, and though their manners are not fastidious, and carelessness or indifference as to looks prevails among them, their morals are good.

Wages are low, and in some industries almost beggarly, but owing to a general disposition to save, a large proportion of the girls own stock in building associations or have bank accounts.

As a rule the establishments in which the girls work are not well calculated for industrial uses. Many of them are without proper means of escape in case of fire, many have no dressing rooms or closets, and most are neither sufficiently lighted nor properly ventilated. A few exceptions to this rule were found, several buildings being fitted with all the latest conveniences.

The shop regulations are kind and fair, the moral tone of the workrooms respectable, and the employers, as a class, just.

Louisville.—Comparatively few of the working girls of Louisville live in tenements. Many reside with their parents or friends in frame cottages of from two to three rooms each. These are usually comfortable homes, being well lighted and ventilated, and, though plain, often well located amid attractive surroundings. The sanitary condition of the city is good, wages, except in a few industries, are fair, and living is comparatively cheap. The working women are, as a class, honest, respectable, industrious, and polite, but from this statement must be excepted nearly all of those who are employed in the tobacco factories. These, with few exceptions, are ignorant, coarse, and filthy. The mixture of races and sexes in this employment, and the character of the work itself, have doubtless had their effect in producing this condition.

There is a great variety in the conditions under which the girls work. In some establishments the sanitary conditions are very good, in others very poor. As a rule the greatest friendliness exists between employers and employés.

Newark.—The houses of the working people are usually of frame, in long rows, but not tenements, except on a few streets. In the "Neck" and in East Newark the working classes are rough; elsewhere they are respectable, well-to-do, and comfortable. The sanitary conditions are as good as the nature of the case admits, but the general health of portions of the city is said to be affected by the proximity of the marshes or salt meadows. The manufacture of buttons, corsets, shirts, boots and shoes, trunks and travelling bags, hats and caps, silk, and cotton and linen thread gives employment to large numbers of women and girls, and the work for the most part is very steady and quite remunerative. The thread mills especially employ great numbers of girls, one factory alone giving work to nearly 800, classified according to occupation as follows: Spoolers, 90; twisters, 150; winders, reelers, and examiners, 114; paper box makers, 120; ticketers and packers, 42; employés in spinning department, nearly 300. These thread mills are among the very best of industrial establishments as regards neatness, sanitary conveniences, and precautions against fire. In these mills there is good light throughout, and proper ventilation except in the spinning department, where a humid atmosphere is essential, and where, consequently, the windows are kept closed. Notwithstanding the humidity of the air the dust is very thick, rendering work all the more unhealthy. In the thread mills proper the work is light and very clean. The wages are good and the class of employés superior. It is thought proper to specify the conditions of employment in this industry because it occupies such an important place among the branches of business in Newark which give employment to women. As to other industries the conditions are somewhat varied. In some of the stores the wages are low, the hours long, and the rooms dark, but as a rule the general conditions are rather favorable than otherwise.

New Orleans.—Creole character and customs give an individuality to

the working life of New Orleans, and render comparison with other cities difficult. The population being mainly derived from the Latin races, it follows the mode of living of its French or Spanish ancestors, but incorporates it without inconvenience with the national existence. Like their French progenitors, the creoles live well on what Americans would throw away; hence the excessively low pay which prevails in some employments does not entail dire poverty. Even from the pittance earned by the sewing women there is always enough to buy a lottery ticket.

The tenement house happily does not exist, but the lodgings of the poor are mainly dark, circumscribed, and unsanitary. Separate homes are unusual except in the suburbs. The sewerage of New Orleans is a paradox, the drainage being into a lake higher than the city, and "back water" floods the sewers at every rain. Food is abundant, especially products of the sea and the tropics. Culinary art reaches a high perfection, and the poorest may live well.

The Roman Catholic population is large and devout. The moral conditions at home are no worse than in any other city, while in the shops they are unusually good. In the cigar and tobacco factories the girls are of a better class than in northern establishments of the same industry, and the saleswomen are noticeably refined and educated. In many shops "breakfast" at 12 o'clock is given to the employés, and among the milliners and dressmakers two good meals a day are often furnished.

This mingling of proprietor and help has advantages from both social and moral standpoints, and the shop girl in these pursuits is a model of decorum. Most employers take proper care of their help, and antagonism of interests is unusual.

New York.—Two features in the conditions of New York city so largely affect the working women there as to dwarf all other considerations—the tenement house and the influx and concentration of foreign immigration. The existence of separate homes is a rarity even among the well-to-do industrial classes. The crowded condition of the poor and struggling is beyond belief, unless actually witnessed. This brings with it disease, death, immorality, etc. Tall rear tenements block up the small air-spaces that are insufficient even for the front, and often a third house stands behind the second. Sewerage is lacking or defective, and stenches of all kinds prevail in the poorer quarters. The new tenements are built with more attention to air, light, and cleanliness, and there is a growing movement towards securing better homes for the working population. Ground being so dear, rents are enormous. The necessaries of life are high, and many of the poor live on the refuse of the markets. On the other hand, the comforts of life are found in the vilest tenements. Carpets and clean beds, lace curtains, upholstered furniture, pictures, pianos, and organs are not infrequent.

Among the foreign settlers the illiteracy is very great. Ambition to learn English, however, fills the night schools with eager pupils, while

the native population is content with ignorance. Working girls born in New York are alert and worldly wise rather than well educated, even according to the standards of the public schools. The pressure of necessity drives them early into the workshop.

The moral condition of the working women is influenced for evil by the tenement-house home in a way too vast for discussion here. One noteworthy cause of immorality is the taking of men as lodgers for the sake of extra income. Another is the long distances girls are compelled to traverse after dark, especially on leaving stores which remain open till 10 or 11 o'clock on Saturday night. Another is the crowding of friendless young women to the metropolis, where they live without home restraint, suffering every conceivable discomfort, subject to long periods of idleness, which they often enter upon with an empty purse. Even among the lowest grades, however, there is a ready response to gentle treatment and an innate politeness that can spring only from a kind heart. The truest heroism of life and conduct was found beneath rags and dirt. In dress and bearing the better class of working girls compare favorably with women of leisure and refinement. The almost invariable church contributions, especially among the foreign population, indicate a steady church attendance.

As respects ventilation, a properly regulated work shop is the exception. The average room is either stuffy and close or hot and close, and even where windows abound they are seldom opened. Toilet facilities are generally scant and inadequate, a hundred workers being dependent sometimes on a single closet or sink, and that too often out of order.

The moral conditions of the shops vary with the character of the occupation, the foremen and forewomen, and the interest the proprietor takes in his employés. Wherever the sexes work indiscriminately together great laxity obtains. In well conducted rooms the tone is often higher than in the girl's own home. Open violations of morality are rare, and always discountenanced. Wherever the employer was personally acquainted with his people the standard of conduct was apt to be excellent. In many an instance, however, the employer openly declared that so long as his work was done he did not inquire or care how bad the girls might be.

Considering the cost of living, wages are little, if any, higher in New York than in other cities, though the number of well paid positions being greater the chances of promotion are better.

Actual ill treatment by employers seems to be infrequent. Kindness, justice, and cordial relations are the general rule. Foreigners are often found to be more considerate of their help than native born men, and the kindest proprietor in the world is a Jew of the better class. In some shops week workers are locked out for the half day if late, or docked for every minute of time lost, an extra fine being often added. Piece workers have great freedom as to hours, and employers complain much of tardiness and absenteeism. The mere existence of health and labor

laws insures privileges formerly unheard of; half holidays in summer, vacation with pay, and shorter hours are becoming every year more frequent; seats for women and girls are more generally provided; better work shops are constructed, and more comfortable accommodations are being furnished.

Philadelphia.—In Vol. XVIII of the Tenth United States Census, page 830, the following comments are found as to the system of house-drainage and sewerage in Philadelphia:

While the work done includes some well planned and well constructed main sewers, the system as a whole is totally and inexcusably bad, violating nearly every accepted principle of sanitary engineering, and inevitably counteracting those natural influences which are so conducive to the health of a population. It is, however, proper to call attention to the generally accepted and doubtless correct statement that the death rate of Philadelphia is lower than that of other cities which have fewer palpable defects in their public and private sanitary works. This low death rate can be ascribed only to the very favorable conditions under which the working classes of the population live. As a general rule—and this is a very marked and most interesting feature of Philadelphia—every family lives in its own house, and every individual lives and sleeps in a room well lighted and ventilated by outer windows. This condition removes from the problem the most important feature of "overcrowding," to which is due so much of the mortality of large cities the world over. The proper inference would seem to be that, this factor being absent, if a proper system for the removal of household wastes could be extended to all parts of the city of Philadelphia, it might reasonably be hoped that there would thereby be secured a lower death rate, even much lower than that of any other city of the world.

The foregoing extract presents very clearly one feature of the home conditions of the Philadelphia working class, viz, the preponderance of separate homes. Notwithstanding this fact, it is curious to notice that the proportion of working women who live in lodging houses, boarding houses, or private families, as indicated by this investigation, is larger than in any other city visited except Boston and Saint Paul. No especial attempt was made to interview those who board, and it is presumable that the proportion which they bear in the cases investigated to girls who live at home is about the normal ratio in the working population of the city.

The moral tendencies of the Philadelphia working women are of a distinctly high order. Young women who support themselves are, as a class, respected and self-respecting. The majority of working girls have church affiliations and duties, and contribute to religious institutions in some form. Very many—so many as to constitute a marked feature of Philadelphia working life—teach in Sunday schools and labor zealously for the church. The educational facilities of Philadelphia are excellent, and fondness for reading, lectures, music, and art is quite pronounced. Many of the homes contain pianos and books, and the furnishings combine effectiveness and taste with cheapness. There is

a disposition to save, but the competition for place and work is great, and as a consequence wages are rather low.

The textile manufactories of Philadelphia are of great importance and extent, and have trained a large body of skilled workwomen, who can always earn a living at their trade. Some of the mills are new and handsome, others are old and inconvenient, and the sanitary condition of most is open to criticism. In certain factories the division of labor is carried to the last extreme, the girls being proficient in but one of many processes. The worsted yarn mills employ very young girls, sometimes violating the law against child labor.

Fining for bad work is general but, as a rule, not unjustly enforced. The shop rules are sometimes stringent, and in certain industries wages are reduced by charges for machine rent, cotton, repairs, etc., to an extent not obtaining elsewhere.

The actual competition of women with men is a feature of textile factories and cigar making in Philadelphia, and in many cases the women earn equal pay with men for the same work.

Squalor, ignorance, and vice, though not absent in the shops of Philadelphia, are not so offensively prominent as in some of the large cities.

Providence.—The homes of the working people in Providence are generally frame buildings, accommodating from one to four families each, the tenement house proper being almost unknown. These homes are very comfortable and rents are low.

In the neighborhood of certain of the mills, where the houses of the employés are owned by the mill operators, drainage is neglected, and the health of the inhabitants suffers, but generally speaking the sanitary conditions are fair. The home surroundings of many of the girls in the mills indicate education and thrift, carpeted floors, books, pictures, etc., being not infrequently found. Over 20 per cent. of all the women seen in the investigation were found boarding, either in the boarding houses connected with the mills or in private families.

The educational advantages are very superior, the school system being excellent, but the schools are depleted by the mills into which children are received as soon as they arrive at the age permitted by the law, and in fact the law is frequently disregarded.

Religious observances are general, and the general morality of the working women is unquestioned.

The older mills are defective in light, ventilation, and space, are often without dressing rooms, and frequently the ordinary sanitary requirements are disregarded. These conditions, with the floating dust incident to work in the mills and the rigor of the climate in the winter season, induce diseases of the lungs. The extensive jewelry manufactories are usually well suited for their uses, but parts of the work are said to be very injurious to health. Wages correspond with those received in other manufacturing centres. Fines are common, sometimes becoming a heavy grievance.

Richmond.—Among the working women of Richmond nothing is more noticeable than the almost universal pallor and sallowness of countenance; nothing more uncommon than an example of the robust health so frequently met with among the northern working girls. Climatic conditions, bad drainage in the city, bad drinking water, and unsanitary homes and modes of life doubtless account for much of the seeming ill health among the girls, but there seems to be a general inertness among those even who do not claim to be sick. In connection with this question of health a curious trait was brought out in the investigation by queries regarding doctors' bills. Many families have been treated free by certain physicians for years past, and in answer to the query "Have you paid any doctor's bill?" the constant response was "My mother is a widow"! The girls seemed to feel no personal responsibility for such services even though able to pay for them.

The price of board is low, and many girls from the country are employed in the city and live with relatives, or board in private families.

The girls, as a class, are extremely neat and ladylike in appearance and behavior. The employers are considerate of the comfort of their employés; toilet and sanitary arrangements are, almost without exception, good; seats are provided and used in stores; and the spirit of politeness governs the work room. In one large cigarette factory, employing seven hundred and fifty girls, there is an excellent library for the free use of the employés.

Religious feeling is strong and religious observances almost universal. In the tobacco factories, where the races are mixed, immorality is much more noticeable than elsewhere. In general, the working girls bear an excellent character. There is much illiteracy among the older women, and among the girls coming from the country; among the city-bred girls a fair degree of education exists, coupled with an attractive ease and propriety of diction, made all the more noticeable by contrast with the language of the colored working people and the girls from the country districts.

Saint Louis.—In Saint Louis there is work in abundance for all women who want it. The industrial class is largely German and exhibits the thrift which is characteristic of that nation. The tenements are arranged in floors for separate families, and are usually provided with wide halls and back porches. The apartments generally have carpets and good furniture, and the working classes live very well, and even in the poorest quarters the inhabitants exhibit cleanliness in the care of their dwellings.

The manufacture of clothing is largely carried on in Saint Louis, and some of the worst establishments visited during the entire investigation were found among the "tailors' back shops." The tobacco industry is almost monopolized by foreigners, whose habits of life are often riotous. In this industry the work rooms are fine and the eight-hour rule is general, but the wages are low. The wages of saleswomen are above

the average, in some stores equalling the rates paid in New York, but the weekly working hours are longer than in any other pursuit, the stores remaining open every evening, and, in consequence of the general disregard of Sunday, remaining open on that day also.

There is comparatively little church going among the Saint Louis working girls, the dance houses claiming the attendance of altogether too many, even of girls from thirteen years of age upward. Sunday balls and matinees are largely patronized. There are no libraries, lecture courses, or clubs to afford their advantages to working girls, and there is much illiteracy among them. In whole industries, such as tobacco factories, stamping works, match factories, bagging and cotton mills, few girls were found who had received much education.

The moral conditions are generally of a lower standard than is found in many other cities, but in some work rooms as high a moral tone prevails as is found in any other community, and some proprietors look carefully after the physical and moral welfare of their employés. It is gratifying to know that this class is increasing.

Saint Paul.—On account of the scarcity of labor the condition of the working girls of Saint Paul is very prosperous. The cost of living is high, but wages are comparatively higher. A very large proportion of the working girls of the city live in boarding houses, lodging houses, or private families, and quite a considerable number rent rooms and do their own cooking. The minds of most of the girls seem bent on accumulating, investing, and becoming independent, and instances are not wanting of girls who, having invested their little savings in a vacant lot of ground, have, in the course of a few years, by the rapid rise in the value of property, acquired a modest competence. No poverty among the working people was seen or heard of in the city. The tenement house is as yet unknown, and many working people own their homes.

The deportment of the girls generally is orderly, and is a decided contrast to that of the girls in some of the other cities visited. The shop girls (saleswomen), though in no sense superior in intelligence, are quiet, respectable, and thrifty.

The work rooms are, in the main, good, and the treatment of employés of the best. Fines and docking for tardiness, etc., are exceptional.

San Francisco.—The presence of the Chinese has had a considerable influence upon the industrial condition of San Francisco working women. For a number of years it has been the custom to employ Chinese as house servants almost exclusively. Since the restriction act has lessened the supply of Chinese, San Francisco housewives have attempted to get white girls to do house work. To get them is very difficult. House service has so long been the special field of the Chinese that the white girls feel there is something degrading in the work. The same girls who refuse house service will perhaps accept work in a

cigar factory, which although employing Chinese, is not preëminently the Chinese field of labor. In fact, in one or two cigar factories visited by the agent of the Department, white girls were found working at benches side by side with Chinese.

The fruit canneries of San Francisco afford temporary employment to a large number of women and girls. During the season, which lasts from the 1st of June to the latter part of August, these canneries employ hundreds of girls. The rest of the year the cannery girls go to school, engage in domestic service, or stay at home. In the canneries of San José, Oakland, and other neighboring towns, the girls employed are often of good family and education, some being school teachers who thus spend a portion of their vacation in a not unpleasant occupation that brings them "pin money." In San Francisco the fruit cannery employés are, as a rule, of a lower class. The canneries are usually in a very dirty, unhealthy condition, crowded with a motley array of people of all races and of both sexes, and the women employed in them are less intelligent and respectable than those in the canneries throughout the rest of the state.

The poorest class of women in San Francisco are the seamstresses. A number of institutions were discovered by the agent of the Department where a regular system of fraud was being practiced upon the defenceless sewing women. The general plan of such frauds is, in brief, as follows: A standing advertisement is kept in the papers asking for girls to do tailor sewing. When a girl applies she is told that it will take her several weeks to learn the work, but that after she has learned good wages will be paid. The girl accepts and goes to work, and after four or five weeks, when she demands pay for her work, she is told that she is not satisfactory; that she can not be employed. The agent found cases of this kind where women had not only given their labor, but had also brought their sewing machines to the fraudulent factory and given the use of them, and at the end of the month or more had been sent away without pay. The exposure of this system, which was practised by a number of disreputable firms in San Francisco, led to a mass meeting at which a sewing girl's union was formed, one of the objects of which is to prevent such frauds and to prosecute them when perpetrated.

Almost all the necessaries of life are dearer in San Francisco than in eastern cities, but to counteract this wages are slightly higher, and the mildness and evenness of the climate enables the working woman to do with less fuel, less clothing, and even less food. It seldom happens that a San Francisco working woman spends anything for fuel except for cooking purposes.

Savannah.—Industrial pursuits are almost closed to girls in Savannah, partly because of a lingering prejudice against the entrance of woman into the struggle for livelihood, and partly because the chief industry of the city—the buying, handling, and shipping of cotton—affords no scope for the employment of women.

In the dry goods stores, however, girls are largely employed, and they are also to be found in a few bookbinderies and bakeries, in dressmaking establishments, and in the cotton mill. The laundries here, as elsewhere throughout the South, are almost monopolized by colored help.

The cost of living is rather high in Savannah, but actual want is rare. The homes are separate frame dwellings, and are well situated and comfortable. The sewerage is good and the sanitary conditions generally well cared for. The health of the girls is good and their education above the average in neighboring cities.

The conditions under which the girls work in the dry goods stores are generally favorable, except in the particular of late hours. The general rule in the city is to keep the stores open until 8 or 9 o'clock every evening, and until 10 or 11 o'clock on Saturday evening. The relations between the girls and their employers are most kindly, and restrictions and discontent are extremely rare.

Parochial schools are a feature of educational life in Savannah, and are recognized and partly supported under the public school system. Church attendance is general among the working girls, and moral standards are high.

CHAPTER II.

BOARDING HOMES, AIDS FOR WORKING WOMEN, ETC.

CHAPTER II.

BOARDING HOMES, AIDS FOR WORKING WOMEN, ETC.

In nearly all the cities visited it was found that many worthy institutions have been established for the purpose of securing to working women protection when protection is most needed. This is when they are first seeking employment and have little means on which to support themselves until a situation is found, or when, having been at work, through sickness or other cause, they may lose a situation, and not having been able to save anything or but little from their earnings they find themselves in a partially destitute condition while seeking another situation. These are the experiences which most thoroughly try the integrity of the working women in any city. To help them bridge over these dark places many institutions have been organized. The working girls do not want charity, and the boarding homes which have been established here and there are not charities, but they offer the advantages of coöperative work to those who can not afford to pay high prices for their living. The agents of the Department were instructed to secure information relative to such boarding homes in the different cities visited. It is possible that some institutions of this sort may have been overlooked, but diligent inquiry was made in all directions, and it is believed that at least all of prominence and effectiveness were discovered. All the facts obtainable about each have been set forth as fully and specifically as seems necessary to a proper understanding of their aim and accomplishment.

The sanitary and moral value of the boarding homes—the outgrowth of practical benevolence and Christian effort—can be properly appreciated only after seeing and studying the character and surroundings of the cheap boarding and lodging houses which are the ordinary homes of the poorer paid among the working girls in large cities, and which are usually in the dingiest, filthiest quarters, in narrow, crowded streets, where drinking shops, gambling houses, and brothels abound; for it is only in such localities that the unfriended laboring woman can find a lodging low enough in cost to be within her means.

In these narrow streets the roadways and pavements become recep. tacles for the garbage and dirt of all the population, while the sewerage is almost universally bad.

Within doors things are very generally in harmony with their exterior surroundings. Bare and filthy floors; broken or blackened window

panes and rickety furniture; meagre meals of ill-selected and ill-cooked food; the sights, sounds, and smells of the filthy surroundings—these constitute the home comforts provided by many of the cheap boarding and lodging houses of our great cities. Two girls are sometimes crowded into a little hall chamber, carpetless and fireless; three and even four share a larger room without a comfort or convenience. A bath room is unusual. The dining room is often the family kitchen, living room, and laundry. There is rarely a parlor. The girls must, as a rule, receive their male acquaintances in their rooms or meet them on the street.

The sleeping rooms are so cold in winter that failing utterly to keep warm until the hour for retiring, the girls are allured by the warmth and brightness of the dance houses and saloons, where they must of necessity meet undesirable and unsafe acquaintances.

Contrast this cheerless existence with its perilous freedom from all restraint with the advantages of even the poorest and plainest of boarding "homes." A quiet, respectable street; clean halls and stairways; a neat parlor, and usually a library or reading room, both well warmed, well lighted, and inviting; a well kept dining room; wholesome food prepared in a clean kitchen and served invitingly; bed rooms spacious and well ventilated, however crowded, and usually so adorned as to be pleasant to the eye; trunk space outside; privileges of a bath room and usually of a laundry, thus saving the expense of having washing done; bed rooms tempered if not warmed, and a well heated sitting room for social talks, readings, or games; young men allowed to call almost every evening, and permission accorded the girls to remain out after 10 o'clock under proper escort for special entertainments; religious services regular and earnest, but not obtrusive or compulsory; a matron ready with sympathy or suggestion; medical attendance and kind nursing during illness; an air of refinement pervading the house and surrounding the inmates; no rough associations or immoral influences; such conditions make a veritable home where girl or woman may live in accordance with her individual nature, sheltered from intrusion, self supporting, self-respecting, useful, respected, and even beloved.

These homes should not be regarded as "charities," for they are not such. They should be looked upon rather as coöperative enterprises, where the funds which the women would individually expend for a poor and insufficient living are, by combination and judicious management, rendered sufficient to give to all those advantages which without such combination would be beyond the reach of any.

Atlanta.—There is no boarding home in the city which accommodates working women of the classes embraced in this investigation. The Home of the Friendless shelters the unprotected and absolutely destitute, and the Women's Christian Association Home contains some women engaged in the higher avocations.

The need of provision for factory and shop girls is recognized by the

Women's Christian Association, and this organization has in contemplation the establishment of a boarding home for working girls.

Baltimore.—In proportion to its population, Baltimore possesses as many aids for working girls as any city in the United States. Efforts in behalf of the improvement of the poorer classes are widespread and sustained. Sectarian spirit is not conspicuous, and concert of action by churches, charitable and benevolent societies, and individuals insures the most valuable results. Prominent among these beneficent agencies, here as elsewhere, is the Young Women's Christian Association. Filled with youthful workers of wealth and leisure, whose zeal is directed by the counsels of older and more experienced heads, the association is distinguished by life, energy, and courage, and its progress and growth and the results it has accomplished are everywhere visible.

The association owns a large building on Liberty street, capable of accommodating thirty permanent boarders, and also giving space for lecture, class, and lunch rooms. The lunch room or restaurant, located, as it is, within a few blocks of the business thoroughfares, and thus easily reached by working girls at the lunch hour, is a most valuable feature of the association's work. The excellent toilet facilities are particularly grateful to the frequenters of the rooms, for in many of the Baltimore shops sinks and closets are sadly neglected. The cost of the food sold here is lower than in other restaurants even of this class, in which prices are always low; the quality is excellent, and neat tables are provided, free of all cost, for those who bring lunches from home. About one hundred girls take meals here daily.

The association cond ucts ten departments, including kindergartens, lecture courses, classes for varied instruction, employment bureau, bible classes, and mission work. Branches are located in the worst districts and reach the poorest, lowest, most depraved of the laboring population. Besides religious guidance and influence, and the practical instruction bestowed, the association has introduced some of the best features of the working girls' clubs of New York. The Helping Hand Society, organized on this principle, is the latest notable offshoot of the association. The society has rented two pleasant rooms—a parlor and a class room—at No. 18 High street, East Baltimore. The rest of the house is devoted to lodgings for young women, and is a recognized branch of the Young Women's Christian Association Home. In the club informal talks are given, dressmaking and other classes are in operation, and cooking lessons are proposed. The Helping Hand now consists of forty members, most of whom are employed in the factories of East Baltimore.

The Christian Association lends books, furnishes amusements and social entertainments, through its "fresh air fund" sends girls to the country, and encourages economy and thrift. In its home dwell straw workers, shirt makers, overall sewers, dressmakers, milliners, and shop

girls, the price of board varying with circumstances. Catholics are as freely welcomed as Protestants.

A well known Roman Catholic priest, desiring not to be outdone by his Protestant friends, established a Catholic home from which Protestants are not excluded, and St. Vincent's Home, located in a quarter hitherto lacking all such facilities, shelters about thirty self-supporting girls of all creeds. The rules are not more strict than decorum requires; laundry privileges are allowed; the house is comfortable and the surroundings are good.

Connected with the Children's Aid Society is the Henry Watson Home, located on Calvert street. Owing to the encroachments of business the house is badly located, and is only half full. Girls working in the big dry goods shops and earning as little as $2 or $3 per week, can live here comfortably, for the price of board is graded in accordance with the wages received. Washing is done free, and medical attendance is furnished. About fifteen girls reside in the home, under the care of a capable and motherly matron. A large sewing school with full classes, morning and afternoon, trains hundreds of children and girls in the use of the needle and machine, cutting and fitting.

The Female Christian Home, on Green street, is the oldest institution of the kind in the city, having been instituted twenty-two years ago to protect young girls who come to the city for employment. Its sanitary arrangements are excellent. Half of its inmates are students at the normal school, the remainder being employed as seamstresses or shop girls. The girls are furnished boarding and washing for $3 per week.

St. Paul's House, connected with St. Paul's parish, besides its new guild quarters, contains accommodations for eight or ten girls of the parish, and it is designed to provide for as many more. Each resident has a neatly furnished single room. The inmates are chiefly sewing women.

The Girls' Friendly Society of the Episcopal Church has numerous active and influential branches in Baltimore. These afford the nucleus of social ties for homeless and friendless strangers, and furnish moral restraints of the most beneficent nature. Cotton mill operatives and cigarette makers are useful members of many of these societies—women for whom the homes have no place. For a fuller account of the methods pursued by these societies in affording aid to working girls, see what is said under New York.

Boston.—The need of suitable boarding places for working girls coming to the city was early recognized by the Young Women's Christian Association of Boston, and in their constitution it was made one of the duties of the board of managers, assisted by the standing committee, to aid such young women "in the selection of suitable boarding places and employment." The difficulty of finding suitable boarding places for these strangers was met partially by the establishment of two family boarding houses, one at No. 68 Warrenton street, and the other on

Berkeley street, corner of Appleton. These structures are built on improved plans, especially the latter, which is a model of convenience and contains every modern improvement. Both homes have ample light and ventilation, safeguards against fire, electric bells, attendants, offices, well stocked reading rooms, libraries, lecture halls, handsome parlors, well prepared food, and pleasant rooms, and the Berkeley Street Home possesses a fine gymnasium. Both houses accommodate about three hundred girls, the price of board varying from $3 to $5.50 per week. More than one-half pay from $3 to $4, which includes washing and ironing, heating, and lighting of rooms, the use of reading room, library, and parlor, and admission to all entertainments of the association. In connection with these homes the association has an industrial department where dressmaking and fitting, button-hole making, trimming, and draping are taught. In this department there is also a training school for house service, to which great and systematic effort is devoted. Girls can remain three months and be taught all the details of housework and cooking free. These pupils do all the cooking, cleaning, and table and chamber work for the resident superintendents and instructors. The association has also organized a Chautauqua circle among the residents of the homes, and in addition has provided for classes in the elementary branches, bookkeeping, stenography, typewriting, singing, and the French language at prices within the reach of all the girls.

Another most valuable department of the association's work is the employment bureau, divided into two branches: one for domestic service (through which situations are procured for the pupils of the training school, as well as for others), the other a business agency. The first branch provides servants for families in city and country. Great care is taken to receive only those of good character. This department accommodates twenty boarders, who may remain for a period not greater than fourteen days, by paying a moderate board. Two thousand one hundred and forty-five girls were supplied with employment by the department during the year 1887, and of this number 36 per cent. took places out of the city. The business agency registers clerks, bookkeepers, stenographers, typewriters, compositors, dressmakers, seamstresses, nursery governesses, etc. A specialty of this branch is to supply help by correspondence in any part of the country, and to provide hospital-trained and practical nurses as late in the evening as 10 o'clock.

Another feature of the association's labors is the department known as "The Travellers' Aid." The object of this department is to protect young working girls on their first arrival, by land or sea, and the means taken have been most thorough and successful. The address of the association was formerly placed in the depots and boats; officials of railroads and stewardesses of boats were visited; advertisements were placed in the papers of the British provinces, and societies and individuals were communicated with, urging that all young women coming to the city be supplied with letters of introduction, and advised to come to the asso-

ciation, where a portion of the house is always kept for transient boarders. Recently other Christian workers have taken hold of this branch of work, and since May, 1887, the association has confined its labors to the work at the wharves. In July, 1887, a special agent was employed who devotes her entire time to this work. She meets foreign and coast steamers, cares for unprotected girls, aids others in finding friends, and advises such as are unaccustomed to travel in regard to the most direct and economical means of transportation, etc. Cards are distributed showing the best way of securing employment, with circulars of information directing girls to the association homes, and warning the unwary against evil-disposed persons. During the nine months preceding the last annual report of the association more than seven hundred girls were cared for in one or more of the ways mentioned.

The Girls' Friendly Society of the Episcopal Church has active and progressive branches in Boston. It shares with the Young Women's Christian Association the work of the "Travellers' Aid," its agent meeting strangers at all railway stations, and counselling and aiding them to secure a proper home and employment. The Girls' Friendly Society also sustains at its headquarters, No. 51 Temple street, an excellent boarding home, having seventeen beds and accommodations for over thirty residents. The expenses, except rent, are met by the income from board, which varies from $2 for an attic room to $4 for the best. No Roman Catholics are admitted, save transiently.

Prominent Roman Catholics have recently organized the Working Girls' Friend Society, which has opened a permanent home at Nos. 34 and 36 Dover street. Although in charge of the Gray Nuns, the home is not strictly sectarian. The houses are newly furnished and are exquisitely neat and clean. They have accommodations for thirty-five girls, and when visited had eighteen residents.

The New England Helping Hand Society conducts, at No. 12 Carver street, an admirable home for poor working girls. This home furnishes board and room for $2 per week, and thus reaches a needier class than most institutions of this sort. Washing is done by the girls themselves, or given out. The number of girls in the home at the date of the last annual report of the society, May 18, 1888, was twenty-two.

The Working Girls' Club, No. 401 Shawmut avenue, belongs to the New York Association of Working Girls' Societies, and reports annually to the president of that organization. It is the largest, best organized, and most effective club of its kind in Boston, and its sphere of usefulness is constantly enlarging. The assembly rooms are commodious, and the classes full. A reliable employment office encourages domestic service. Many of the members of the club are factory girls.

Among the agencies which have improved the North End, the North Bennett Street Industrial School has been most powerful. Its night classes are open to working girls, and many attend. A girls' club, made up from denizens of the neighborhood—chiefly the Italian quarter—

meets in a pretty room belonging to the school, and specially furnished for this use. The club has the countenance and influential backing of the ladies who direct the industrial school. The button factories are largely represented here.

A few girls from the Roxbury factories attend night sessions of the South End Industrial School. In the dressmaking department one hundred and thirty-six women and girls of all conditions received instruction during the year 1887, and are reported to have made marked improvement, not only in the use of the needle, but in habits of order, neatness, and thoughtfulness. Seventeen pupils were graduated from this department during the year, many of whom have found permanent situations giving them good support. An evening class of women bring their own materials, either new or old, to be made into garments. They are taught to cut economically and correctly, to make and mend, to patch, darn, etc. In the printing department boys and girls learn type-setting, and, out of sixteen graduates of the department, thirteen had found good situations, and one young girl, soon to leave, had a place engaged in the office of the Youth's Companion.

On Hampden street, Roxbury, in the heart of a manufacturing district, is another working girls' club, with about forty members. Evenings are devoted to games, social amusements, lectures, and classes for self-improvement. There is also a reading room, and coffee or tea may be had at noon for a trifle.

The Women's Educational and Industrial Union, No. 74 Boylston street, is an organization from which emanates the broadest and most typical work in behalf of woman. It is unsectarian. Its well stocked reading room and parlors are open to all at all times. It provides classes in twenty different subjects and lectures and entertainments of the most varied kind. It secures wages unjustly withheld from working women. It makes a special feature of investigating advertisements offering work to be done at home, etc., and if found to be fraudulent, women are publicly warned against them. It procures situations for the unemployed, and sells on commission the proceeds of woman's industry. A new feature of its work has been the opening of a lunch room, where a girl bringing her own luncheon may eat it, and where a simple but reasonably varied bill of fare may be had at moderate prices. The Union has been active in securing legislation requiring the appointment of police matrons in large cities. It has published and distributes a circular setting forth the main features of the law regarding the following points: agreements for wages, a week's trial, giving notice of intention to leave or dismiss, forfeiture of wages, breakage of articles, the effect of compromise concerning wages, the poor-debtor process, and hiring of rooms and detention of trunks. One of its attorneys makes a specialty of looking up titles to furniture, as where a woman hires a house and buys the furniture in it, not knowing but it may be mortgaged or but partly paid for on the installment plan, and so not actually belonging to the sel-

ler. It holds Sunday meetings, at which the most important topics are discussed by leaders in all lines of moral and spiritual thought and activity. It holds mothers' meetings and talks with young girls, which are addressed by women of high reputation and ability. It has exerted an influence which has reached far beyond its own city, and women in other cities have formed similar organizations.

Brooklyn.—The Brooklyn Association for Improving the Condition of the Poor occupies a dual position in relation to the objects of its care. Mainly a private charity designed to assist those who are temporarily in need, and who are recommended by some subscriber to the care of the association, it still has a sub-committee which provides sewing at remunerative prices to women who are in need of assistance and willing to work for what they receive. For this sewing the women are paid in clothing or in general supplies as they may elect. Work of this character is often furnished to as many as two hundred women per week. This association distributes gratuitously many more garments than these women make, and by buying made-up clothing from the Brooklyn Female Employment Society gives substantial aid to a very useful and well managed enterprise.

The object of the latter society is to furnish steady work to worthy women who are dependent upon their own exertions for their living. This society has several departments of work. In the "coarse-work department" work is given out each Tuesday to women who apply for it, the work to be done at the homes of the applicants. A department of "in-door fine work" keeps a number of women busy at the house of the society, No. 93 Court street, making garments ordered by outsiders, or when orders fail, making garments for sale in the store of the society. A dressmaking department with a competent force is maintained, where orders are received and stock and garments are disposed of. A sewing school for children is also maintained.

The Temporary Home for Friendless Women and Children, at No. 20 Concord street, is intended, as the name imports, for the temporary accommodation of working women. As a rule the inmates remain only till they secure positions enabling them to go elsewhere, when they are expected to yield to others more needy. The charges are graded according to the earnings of the residents, and in special cases destitute girls are allowed to remain without paying any board until they have earned enough to procure a decent outfit, after which a moderate board is required. A laundry is at the disposal of those who care to use it.

The Home for Working Women and Girls, No. 175 Hall street, was closed for the summer when visited by the agent of the Department; but it was stated unofficially that the home was to be re-opened in a more favorable location. Many women testified to the good this home had accomplished.

St. Ann's Parish supports a most useful working-girls' home and day nursery in a comfortable dwelling near the busiest thoroughfares. Only

Protestants with excellent recommendations are received in the home. Here, as in most institutions of similar character, girls losing their situations and unable to pay regularly are helped through the idle period, unless they show disinclination to seek for work.

St. Ann's Mission also has a Girls' Friendly Society, and three other branches of the society have been established in Brooklyn since 1886.

The Young Women's Christian Association, though somewhat overshadowed by the prominence of its New York sister organization, proceeds on the same general plans, and accomplishes results of great importance.

The gift to the city by a private individual of a complete and finely equipped industrial school will undoubtedly be of great benefit to the working population.

Five working-girls' clubs in Brooklyn are active members of the Association of Working-Girls' Societies of New York, and share all its advantages. Wisely scattered in different indigent quarters, the South Brooklyn Club, the Central Club, the Red Hook Club, the Prospect Heights Club, and the Brooklyn Progressive Club are all helping to lighten the burdens of the working girl, to increase her efficiency, and to elevate her character. In all these clubs earnest, intelligent, and cultivated women acknowledge the close bond of sisterhood with rough, ignorant girls, and by tact, patience, and gentle influence develop the best that is in them. The club rooms are open nearly every night; good books are to be had from the library; lessons in useful employments are given at bare cost of materials. In some of the clubs English and penmanship are taught. A cooking course teaches how to buy food in the market and how to prepare it for use. A course of instruction in dressmaking enables the girls to greatly reduce their expenses for clothing. The girls are so ardent in these reforms that their employers often note the improvement, and though generally opposed to organizations among their employés, they favor these clubs, and some employers contribute liberally toward their support.

Buffalo.—The report of the Women's Christian Association for the year 1887 states that its home has been filled to its utmost capacity and applicants have been turned away. No information as to numbers, price of board, etc., is afforded by the report referred to. The association began its work seventeen years ago with but a few dollars in its treasury. to-day it has real estate approximating $60,000 in value, and its course has been marked by steady advancement.

The Women's Educational and Industrial Union, modeled after the Boston society of the same name, is a non-sectarian organization, having for its object the educational, industrial, and social advancement of women. In the certificate of incorporation the means of accomplishing these objects are set forth as follows:

1. By the establishment of a reading room and library.
2. By maintaining a registry for the higher employments of women.

3. By organizing and maintaining classes in educational and industrial branches.
4. By assisting poor women to collect debts and to establish their legal rights.
5. By assisting the worthy poor.
6. By giving courses of lectures on various topics, and social entertainments.
7. By the establishment of a gymnasium for women.

These means have been employed and have been productive of much good. The Union owns a large and commodious building, suited to its requirements. This organization has only recently been incorporated (May 15, 1885), and such progress has already been made as warrants belief that the scope of its labors will constantly widen and the sphere of its usefulness enlarge.

Chicago.—The Protective Agency for Women and Children was established in 1886 by the Women's Club. Its main object is the protection of woman's purity and honor, and the punishment of those who assail it; but it has also devoted itself to the work of collecting debts owed to working women, and of protecting them from swindling and extortion. During the first year of its existence the agency examined one hundred and fifty-six complaints of all kinds, fifty-one of which were claims for money, chiefly wages, aggregating $992 89. It has been quite successful in all branches of its work, and in the collection of debts reaches to the class of small claims which an attorney ordinarily would not care to undertake. The Protective Agency also designs establishing in the near future a loan fund, for the benefit of worthy families or individuals who are in temporary need of such assistance, and who, under existing conditions, are obliged to pay usurious interest for money.

The Women's Christian Association has a home at No. 288 Michigan avenue, where girls may obtain good accommodations for $3.50 to $4 50 per week, not including washing. Women over thirty are rarely received. Transients pay $1 per day. The charges practically exclude girls who receive small pay, and only five or six of the inmates followed occupations embraced in this investigation, the remainder being chiefly stenographers, typewriters, bookkeepers, etc.

The Home for Self-supporting Women, No. 221 Illinois street, was opened in 1887 by a club of benevolent ladies. The uniform rate of board in this home is $2.50 per week. The house is filled to overflowing, the inmates being chiefly saleswomen, sewing girls, dressmakers, and domestic servants out of situations. The house is small and overcrowded, but the discomforts will disappear as the enterprise progresses, and the principle of cheap board, combined with the excellent management, will render this home a source of great usefulness to the working women of Chicago.

Several Roman Catholic schools, convents, and asylums accommodate a few working girls of their own religious faith, but no distinct home for working women is supported by the Catholic Church.

The Women's Christian Temperance Union in Chicago, as in other cities, indirectly helps mothers who earn a living by providing kindergartens, industrial schools, and day nurseries, where children are cared for and trained to work.

During the past summer a band of ladies fitted up a house in Hinsdale, 16 miles out of Chicago, and invited ten working girls at a time to spend a week. Food was supplied from the homes of the kind projectors of the scheme. When the week's vacation was over ten other girls were invited, and the house was kept full during the warm weather. The girls were selected and sent out by an organization of ladies in the city which bore the travelling expenses.

Cincinnati.—The Sacred Heart Home, at Nos. 140 and 142 Broadway, under the management of Miss McCabe, is a flourishing institution for homeless working girls of all avocations. The terms range from $1 to $3 per week, according to the means of the inmate. Destitute girls are sometimes taken free of charge until such time as employment can be found for them. The house is always crowded, from four to seven persons occupying each room. There is a good steam laundry on the premises, the use of which is free to residents. The home is non-sectarian, youth and respectability being the only qualifications for admission There are about sixty girls in the institution at present, and since its inception, in 1882, it has received about four thousand young women and girls.

Miss McCabe has a similar home for boys on Fifth street.

Cleveland.—At No. 16 Walnut street is a Boarding Home conducted by the Young Women's Christian Association. There are thirty rooms in the house, each of which is occupied by two boarders. The building is heated by steam, and the furnishings are tasteful and comfortable. The cost of board averages $3.12 weekly, without washing. The following are the regulations of the home:

I. Application for board may be presented to the matron at any time, but will be referred for final decision to a committee, which will be in attendance at the home every Tuesday, at 10 o'clock, a. m. Satisfactory testimonials of character will be required in all cases.

II. The same committee will consider the case of boarders who do not conform to the regulations, or who may be exerting an influence contrary to the spirit of the home. No boarders will be allowed to remain whose conduct is not satisfactory to the committee.

III. No boarder will be allowed to occupy a room alone, except by permission of the committee.

IV. Every room must be kept in good order by its occupants, one of whom will be held responsible each week for its appearance. All rubbish must be placed in a box prepared for the purpose, and nothing be thrown from the windows. No lamps will be allowed in the rooms.

V. On the ringing of the bell for meals, every boarder is expected to take her seat promptly at the table. No boarder will be allowed to take food to any room; in case of illness, it will be sent by the matron.

VI. Payment for board must be made to the matron on Saturday of each week. Any boarder wishing to invite a friend to a meal must

receive permission from the matron; she must also notify her of an intended absence from meals. The price for extra meals will be: Dinner, 30 cents; breakfast or tea, 25 cents, each, which will be charged in the weekly bill, unless paid for at the time.

VII. Family worship will be conducted daily, when it is expected that every boarder will be present, unless especially excused by the matron.

VIII. No visitors will be received on the Sabbath. In all cases where an appointment is made to go out with a friend on the Sabbath, the person making the appointment must be in the parlor at the hour specified, ready to meet that friend and pass immediately out, as no notice will be sent to any room. All boarders are expected to attend some Protestant church regularly on the Sabbath.

IX. The house will be closed at 10 p. m.; the lights to be extinguished at 10½ p. m. Any boarder who is absent more than fifteen minutes after the time of closing must bring an excuse that shall be satisfactory to the matron. Repeated absence without satisfactory excuse will furnish ground for dismissal from the home.

X. No boarder will be allowed in the kitchen or laundry, nor to interfere with the domestics. All requests must be made through the matron.

Louisville.—The Young Women's Boarding Home, No. 530 First street, is a large house intended especially for the accommodation of strangers coming from the country to seek work, and for young girls working in the city. The price for board, not including washing, is $2.50 per week. Girls who can not afford to pay $2.50 give as much as they can; and in special cases girls are received without pay. Efforts are made to secure employment for those seeking places. This home is under the care of the Women's Christian Association, and is doing a noble work. The thirty inmates of the home are principally dressmakers, bookbinders, and seamstresses. Residents are admitted only upon proper recommendation, and no Roman Catholics are received. The rooms are heated or at least tempered by heat from the halls. There is a parlor and a sitting room in which the girls can receive their friends. The rules are not stringent, the girls are kindly treated, and the house is always full.

The Girls' Friendly Aid, a society instituted by Christ (Episcopal) Church, has assembly rooms which are open, day and evening, for study, reading, or social amusement. There are classes in stenography, typewriting, and the rudiments of English. Facilities are also afforded for studying instrumental music, and learning to sing by note. There are forty active and twelve associate members of the aid, which has had a most encouraging growth.

At St. Joseph's Infirmary, an admirable institution under Roman Catholic control, there are rooms set apart for the occupancy of young working women while seeking employment, and quite a number are thus temporarily housed. In addition to these transients, a limited number of girls in active employment board regularly at the infirmary.

Newark.—The Women's Christian Association has a boarding home for

working women at No. 104 Court street. The total number of boarders during the year 1887 was seventy-five, the number at any one time ranging from twenty to twenty-five. Recommendations are required for admission, and a high moral and religious tone is maintained. The price of board, including washing, ranges from $3 to $3.50 per week. Lessons in stenography and typewriting are given at the home by a competent teacher at very low rates. During the year 1887 nineteen girls completed the course in both branches, and the majority of these have secured good positions and are filling them creditably. Five girls completed the course in typewriting alone. The board of directors of the home seeks and registers private families in various parts of the city who are willing to board girls unable to live at the home by reason of its remoteness from their places of business.

The Girls' Friendly Society of Newark, at its club house on Centre street, affords its advantages to working girls of all classes. Its two hundred members comprise employés in the thread mills, box makers, shoe fitters, button makers, corset makers, jewellery polishers, saleswomen, dressmakers, milliners, house servants, etc. Classes are maintained in cooking, dressmaking, embroidering, and singing, and religious instruction is imparted. The club house is open from 9 a. m. to 9 p. m., and the annual dues of members are 25 cents, half of which goes to the central fund of the Girls' Friendly Society of America.

New Orleans.—The Woman's Club was founded in 1884 to supply the need for an organized centre where working women could meet for mutual improvement. The constitution, as first adopted, provided only for the membership of working women. It was afterward deemed advisable to erase the word "working" and thereby gain the membership and support of broad-minded women of the wealthier class. The organization is now entirely self-supporting. A fund has been created for the relief of sick and distressed members, and by voluntary contributions the funeral expenses of deceased members are defrayed. The club rents a three-story dwelling containing nineteen rooms. The first floor is used for club purposes, and the upper floors are rented to members. At the club rooms instruction at nominal rates is given in German, French, Latin, elocution, stenography, typewriting, calisthenics, painting, needle work, and in cutting and fitting dresses by chart. There is a library and reading room at the disposal of members, who very generally avail themselves of its privileges. The employment bureau secures positions for copyists, teachers, bookkeepers, governesses, musicians, canvassers, agents, collectors, nurses, housekeepers, companions, dressmakers, seamstresses, cashiers, saleswomen—in fact for persons in almost all avocations save housework. The sewing department embraces dressmaking and coöperative work for merchants. Several of these help the department by pledging work whenever it is needed. The industrial department of the club trains women to be self-supporting by teaching them plain sewing, dressmaking, and em-

broidering. The last annual report of the club states that a growing desire has been noted among the members to fit themselves for some special vocation.

At No. 90 Pleasant street is the Home for Homeless Girls, where girls out of employment are taken in, given sewing, taught cooking, etc., until homes or situations can be procured for them. The home was organized in November, 1885, and on March 1, 1887, had sixteen inmates.

New York.—The Ladies' Christian Union, the oldest women's Christian association in the world, many years ago opened a home where self-supporting girls might dwell comfortably and economically amid respectable surroundings. The mother house on Washington Square contains accommodations for eighty-five persons, and is always full. Its airy location, accessibility, and honored name give it precedence over every other home in the city. The total receipts from board are expended upon the table and household, the other expenses being provided for by the founders. The inmates of this house are, generally speaking, engaged rather in intellectual than in manual pursuits, and but few follow the occupations embraced in the present investigation. A branch of this home is located on Second avenue, and accommodates clerks and saleswomen. The need of protection and cheap board for young girls receiving low pay resulted in the establishment of another branch house on Seventh avenue, within easy reach of the girls employed in the shops of Sixth avenue, Fourteenth street, and Broadway. This branch is known as the Young Girls' Home, and although only recently opened, it is already filled with the very persons for whom it was intended, and vacancies seldom occur. The charge for board is only $2 per week, considerably less than in the other homes of the Christian Union. Special efforts are directed toward securing bright and cheerful surroundings, suitable for the age of the inmates.

The object of the Girls' Lodging House of the Children's Aid Society, as outlined in the report of the society, is "to give cheap board to those earning small wages, to enable them to save something for clothing, as many who are inexpert can not earn more than $3 a week, which is all expended on board at even its lowest rate, while our nominal price of $1.50 per week leaves them a margin for extra expenses." Girls unable to pay their quota are allowed to do housework as an equivalent, and the restraint imposed on these working inmates, who are permitted to go out only on Sunday, is a safeguard against imposition, for girls having money prefer to pay their board rather than to have their freedom curtailed. A special feature of this house is to train young girls in practical industries by which they may make a living. In the industrial department girls are taught hand and machine sewing, cutting, mending, and altering garments. A laundry has also been open for nine years to train girls in this occupation. Many coming here friendless are provided with good homes in the West, where the demand for

their services is constant and their chance of advancement much better than in New York.

Miss Leffert's Home, No. 479 West Twenty-second street, is an attractive residence for working women, and the price of board is moderate. This excellent house is one of the best known in New York.

In connection with St. George Medical Aid Association in behalf of working girls, which aims to supply medical and surgical treatment, to inaugurate a system of mutual aid in sickness, and to establish a vacation resort, a home is afforded to a few working women amid good surroundings.

The Laura House, No. 120 Second avenue, provides, at reasonable cost, genteel and attractive quarters for clerks, typewriters, and saleswomen. No factory girls live here. The house is under the supervision of the Rev. Dr. Potter, of the Tabernacle, and is well managed and constantly full.

In the House of the Holy Family, on Second avenue, in charge of the Sisters of the Divine Compassion (Roman Catholic), where reformatory work is largely carried on, friendless girls not in need of reformatory influences are received and live, sometimes for years, partially supporting themselves in shops or manufactories, paying what they can afford, and enjoying the privileges and training of the house. When they become fully competent to support themselves other quarters are found for them.

St. Mary's Home (Roman Catholic), No. 152 West Fifteenth street, is a home for working girls receiving low pay and desiring protection. Some young girls receiving very low wages pay as little as $1.50 a week. The surroundings are very neat, the treatment kind and sympathetic, and the location most advantageous.

At No. 59 Morton street is a home peculiarly interesting as a business experiment, because it aims to be self-supporting, and is excellent in every particular. The rent of other homes of this class is paid by associations, or churches, or private funds, and not made an item of the annual outlay When it is claimed that such homes are self-supporting, rent, and frequently the matron's salary, lights, and fuel are excluded, the receipts often covering only table expenses. The Morton street home has just completed its first year of existence, and has almost maintained itself without outside assistance. The two parlors are rented to a girls' society; the remaining rooms are filled with busy young women—milliners, governesses, students, companions, typewriters, etc. Prospective vacancies are bespoken long in advance, and but for the dull summer season, when girls out of work go to friends out of the city, the house would fully pay all its expenses.

The Free Home for Destitute Young Girls, No. 23 East Eleventh street, besides giving shelter and instruction to indigent girls, also aids working girls by giving a home at small cost to those whose small pay would otherwise compel them to seek lodgings in doubtful localities,

Here they have good rooms, wholesome food, and healthful surroundings.

The Temporary Home for Women, No. 84 Second avenue, secures to women out of employment clean, cheap lodging away from the haunts of vice. In the restaurant connected with the house a dish of oatmeal with milk costs 3 cents; coffee or tea and a roll, 5 cents; soup, stew, or pot pie, 5 cents, etc. Women with good credentials are allowed to advertise for positions from the home, and many situations have been obtained. The necessity for a permanent home to be conducted in connection with this one is recognized, and the adjoining building has been engaged for that purpose.

The Society to Befriend Working Girls has built a beautiful temporary home for the objects of its care at No. 356 West Thirty-third street. This home is named "Primrose House," and it is intended as a temporary residence for working girls whose resources have become exhausted, or who through sickness or other causes are unable to maintain themselves. Girls who have neither family nor friends with whom to live, and whose wages are less than $5 per week, are allowed to remain at Primrose House until better positions are secured, paying according to the following schedule:

Those earning $1 per week pay 25 cents; those earning $2 per week pay 50 cents; those earning $3 per week pay $1; those earning $4 per week pay $2; those earning $5 per week pay $2.50.

As soon as a girl's earnings amount to $5 a week she is expected to look for another boarding house, and give place to one who earns less than she. The managers of the society find themselves hampered in their work by the need of an appropriate boarding place to which girls may be sent on thus leaving Primrose House, and desire to add to the latter a permanent home.

The Young Women's Christian Association is a far-reaching power for good, whose aim, in the words of its report for 1886, is "to care for the temporal, mental, and moral welfare of the self-supporting women of New York city."

The following statistics, gathered from the sixteenth and seventeenth annual reports of the association, will show in some degree the magnitude and also the growth of the work carried on by this organization. The first column of figures represents the work of the year 1886; the second, the work of 1887:

Bible class.	1886.	1887.
Regular members	621	1,003
Transient members	1,070	5,215

Occupations represented (1887): Book folders; bookkeepers; box makers; candy makers; chair seaters; cigar makers; clerks; crayon artists; dressmakers; flower and feather makers; gold polishers; hair-

dressers; housekeepers; ladies' maids; medical nurses; milliners; missionaries; photo-colorers; proofreaders; saleswomen; seamstresses; silk weavers; spectacle-case makers; stenographers; students; tailoresses; teachers; telegraph operators; typesetters; typewriters; upholsterers; wood and metal engravers.

Education and entertainment.

[Figures for 1886 cover only the period from October 15, 1886, to January 1, 1887.]

	1886.	1887.
Average attendance at free concerts, readings, and lectures	.....	700
Attending free classes in commercial arithmetic	36	81
Attending free classes in penmanship and bookkeeping	111	246
Attending free class in phonography	65	133
Attending free class in typewriting	34	183
Attending free business-training class (opened December 29, 1887)	.....	17
Attending free classes in retouching photo-negatives, photo-coloring, mechanical and free-hand drawing	43	103
Attending free class in modelling and design	.....	47
Attending classes in physical culture	.....	147
Choir music	30	224
Whole number of pupils under instruction	319	1,181
LIBRARY.		
Books in library	9,876	11,610
Books issued to readers (aggregate)	12,391	21,166
Readers enrolled as regular attendants	1,316	2,204
New readers registered during year	497	1,042
Average daily attendance in library and reading room	118	102
Current periodicals in reading room	.....	83

The library, with all its attendant privileges, is free and accessible to any woman, or girl over fourteen years of age, living in this city or vicinity, who is either self-supporting or preparing for self-support, and who will give satisfactory reference and pledge herself to keep the prescribed rules.

Employment bureau.	1886.	1887.
Applicants	1,647	2,062
Employers	1,577	2,184
Positions secured	1,273	1,661

In the employment bureau a fee of $1 is charged to employers for the use of the bureau for six months. A fee of 50 cents is charged to applicants for the use of the bureau for one year. Any Protestant young woman who can furnish references for character and ability may register upon the books. This bureau excludes house servants from its register, but teachers, artists, retouchers of photo-negatives, stenographers, typewriters, clerks, companions, housekeepers, nursery governesses, trained and invalid nurses, ladies' maids, dressmakers, and seamstresses may be obtained there.

Board directory.	1886.	1887.
Number of families offering board or furnished rooms, on register December 31	92	184
Number of applicants for board or furnished rooms during year	335	722

Satisfactory references as to character and reliability are required from both families and applicants; but the board directory assumes no responsibility. Families are charged 50 cents registration fee. Homes are visited, and if found satisfactory are entered on the register. Applicants are not charged. Strangers, who must have a boarding place without delay are sent to one of the homes for women till references can be received.

Needle work department.	1886.	1887.
Seamstresses registered	71	163
Orders filled	595	759
Number of articles ordered	3,363	4,653
Fancy articles sold in department	698	1,193
Garments sold in department	73	313
Amount paid seamstresses during year	$3,190.47	$4,787.61
Pupils admitted to machine and hand sewing class	43	58
Pupils admitted to cutting and fitting class	30	97

Machine and hand sewing classes meet daily (Saturdays excepted) from 10 a. m. to 12 m. for beginners; from 1 to 4 p. m. for more advanced sewers. Garments made in these classes are sold at reasonable prices. Cutting and fitting classes meet Mondays, Wednesdays, and Fridays from 10 a. m. to 12 m., and on Mondays and Thursdays from 7 to 9 p. m.

In addition to these regular departments of work the association, through its "fresh air fund," sends about a hundred women annually to the country for a short rest. Free entertainments, consisting of concerts, readings, or lectures, take place from time to time at the spacious home of the association, No. 7 East Fifteenth street. The influence of this organization, while powerful and far-reaching, affects rather the women in the higher employments than those who live and work in the slums of the city, which latter are comparatively unaffected by it. Among the three thousand women interviewed in tenements, factories, and shops, not one was known to have come under the influence of this noble organization.

The Girls' Friendly Society of the Episcopal Church has become, in some parishes, a powerful factor for good among the working girls of New York. The membership includes, besides communicants of the Episcopal Church, strangers coming from other cities and countries, and girls belonging to no religious body and attending no place of worship. Among the objects of the society are the encouragement of purity of life, dutifulness to parents, faithfulness to employers, and thrift. Pleasant rooms are engaged for social recreation and practical instruction. Classes are formed in singing, embroidery, dressmaking, and cooking; lectures are given, sick funds are provided, libraries are collected, employment bureaus are founded, and social meetings for games, music, and elocution are encouraged. The branch in St. George's parish is doing great good among the poorest, roughest, wildest, and most ignorant girls on the East Side—employés of tailors' "back shops," and of the great pencil, umbrella, silk, and tobacco factories.

The Association of Working Girls' Societies comprises fifteen active and four honorary clubs, with fifteen hundred members. Its inception and success is largely due to the efforts of Miss Grace H. Dodge, now one of the commissioners of education of New York city. The first of these societies had its origin in an upper room of a Tenth avenue tenement house, where with Miss Dodge were gathered a dozen girls whose days were spent in the factory or shop. For six weeks the society met in rooms offered free of charge, and by that time it numbered sixty members, each of whom pledged herself to pay 25 cents monthly dues. A constitution was adopted and rooms were rented for $25 per month. This same society now rents a large house for which it pays $125 per month, subletting a portion of it for $85 per month, thus reducing the net monthly cost to $40, which is fully met by fees and dues from members. During the year 1886–7 the total attendance at the rooms was 8,585, an average of 165 weekly. As in similar organizations, classes in dressmaking, millinery, cooking, embroidering, cutting and fitting, etc., have been organized and are well attended, the class membership in 1886–7 being 200. There are weekly "practical talks" given by the leader, and these form the most interesting and one of the most valuable features of the society. Such subjects as "Men friends," "How to get a husband," "Womanhood," "Purity," "Money, how to get it and how to keep it," "Accounts," "Characteristics," "Books," "Home life," are always popular, and the members never tire of them. Within this society is an organization for helping others poorer than themselves. From this, the parent society, have sprung many others similar in character and almost identical in the means taken to effect their purposes, nearly all having inside clubs, as just mentioned, for assisting the more needy. The association was formed in February, 1884, to strengthen, knit together, and protect the interests of the several societies, and at its annual meetings over a thousand working girls appear, besides hundreds of interested spectators holding cards of invitation. The characters of the girls composing these working girls' societies vary as greatly as do their incomes. A member of one club earns $50 a week; many earn little more in the whole year. Girls from the jute, carpet, and silk mills, the cigarette and box factories, and the tailor shops, mingle with dressmakers, saleswomen, and teachers. In a few of the clubs the very roughest type of the working girl is present, and it is astonishing to note the improvement in manners and the elevation in character which result from even a brief membership.

A valuable adjunct to the working girls' societies has been the establishment of "Holiday House." Through the generosity of a lady, a large and beautiful dwelling on the north shore of Long Island, with extensive outbuildings and 18 acres of meadow and woodland, has been purchased and made over to trustees for the sole use of the association as a vacation home or for other similar purposes. The house holds thirty girls without crowding, and has latent capacity for twenty more.

It is neatly but simply furnished, and each club sends a certain number of girls during the summer to enjoy a short vacation. Each comer pays $3 a week, which secures all country luxuries in the way of food, invitingly cooked and served. The travelling expenses of these sojourners at "Holiday House" are met by the clubs in conjunction with the Working Girls' Vacation Society.

This latter organization, besides aiding the clubs to provide rest and recreation for their members, has its own independent field of labor. Girls are sent to quiet country homes where they may obtain rest and home comforts at low rates. Tickets at half rates are furnished to girls who have friends living at a distance, and excursion tickets to neighboring resorts are given to those who are unable to take long leaves. This society, which originated in the summer of 1883 among a few young ladies who were anxious to benefit working girls unable to leave the hot city for even a short vacation, has steadily grown and is developing new plans for usefulness.

An important experiment for elevating the poor by direct personal example, influence, and teaching was undertaken over a year ago by Dr. Stanton Coit, a leading member of the Society for Ethical Culture. The name "Neighborhood Guild" is significant of the principles and forces sought to be controlled and utilized—neighborly feeling and responsibility. Dr. Coit himself lives in a tenement house in one of the worst parts of the city, with two young clergymen of different denominations as his assistants. The founders of the Neighborhood Guild labor on the secular basis alone. They educate, teach cleanliness and thrift, and try to purify the lives of the families in their neighborhood. They reach the fathers, mothers, boys, girls, and all the little folks. They encourage industry and saving and provide harmless social pleasures which a whole household may share, emphasizing the importance of the *family* and striving to keep its ties intact. A club for boys and two for girls, a kindergarten, and mothers' meetings are all held in the same tenement. Entertainments are given, lectures are frequent, books are lent. Small contributions from neighboring tenants are applied to cleaning the street and other practical sanitation, and to furnishing an ice-water fountain in summer.

The Equity Club designs to secure for all working women fair pay for their services, and especially to place sewing women on a basis which will enable them to be independent of the "slop shops." For plain garments, such as they are accustomed to make, prices are given which are twice as high as the "bosses" pay. Sewing is secured from wealthy women, and garments made for the club are disposed of by a special saleswoman at equitable prices.

The Society for the Prevention of Cruelty to Children exposes and prosecutes every foreman, "boss," or employer, who can be proved guilty of immoral practices towards young girls.

On Sunday afternoons at Cartier's Hall, No. 80 Fifth avenue, Miss

Henrietta Markstein gives free entertainments for working girls. These include vocal and instrumental music, readings, recitations, and incidents of travel, and the hall is filled with eager listeners.

The Working Women's Protective Union, No. 19 Clinton Place, states in its constitution that its object shall be—

To promote the interests of women who obtain a livelihood by employments other than household service.

This object shall be sought—

(1) By securing for them legal protection from frauds and impositions free of expense.

(2) By appeals, respectfully but urgently made to employers, for wages proportioned to the work performed and to the cost of living, and such shortening of the hours of labor as is due to health and the requirements of household affairs.

(3) By seeking new and appropriate spheres of labor in departments not ordinarily occupied by women.

(4) By maintaining a registry, through which those out of work may obtain employment.

(5) By appeals to the community for that sympathy and support which are due to the otherwise defenceless condition of working women.

From 1863 to 1885, inclusive, this organization filed 290,415 applications for situations; it supplied 48,107 women with places, prosecuted 10,291 cases of fraud, etc., and recovered and paid over to working women $35,372.57 in sums averaging only $3.44, free of all cost to the women.

The attorney employed by the union is present every Wednesday to hear complaints, give legal advice, and suggest remedies; and when milder measures fail, suit is entered against any person who attempts to defraud a complainant and is prosecuted to the end. It is safe to say that of the thousands of dollars collected by the union scarcely any could have been collected without the intervention of law, and the very existence of this union and the knowledge of its work and methods have made employers more careful in withholding from the working woman her just dues. The employment bureau of the union is conducted without any expense either to employer or employé, and has been of great value, as its record of nearly 50,000 situations secured amply attests.

Philadelphia.—In the Home of the Young Women's Christian Association, No. 1117 Arch street, admission is limited to girls earning $6 per week or less. In few private dwellings are ventilation and cleanliness so rigidly enforced. The sleeping apartments are not heated save from the halls, but large reading, sewing, and lecture rooms, and a comfortable parlor and library compensate in some degree for this defect. Concerts and entertainments in the large hall and a bible class are sources of profit and pleasure. Residents pay $3 a week, including a limited number of pieces for the laundry. In rare instances the association makes up the deficit for a worthy girl unable to pay $3 per week. Roman Catholics are not admitted. There are accommodations for over one hundred women.

A night refuge, connected with the home, is entered by a separate stairway, and does not communicate with other parts of the house. Here 10 cents is charged for lodging and 10 cents for breakfast, and in needy cases no charge is made. Six single beds, toilet facilities, light, and heat are provided, and the beds are often engaged as early as 3 o'clock in the afternoon, and many applicants have to be turned away. To the Arch Street Home is attached a restaurant where three hundred or three hundred and fifty girls daily take dinner. Success proves its excellence and the need for similar enterprises elsewhere. The food is wholesome, clean, well cooked, and furnished at moderate prices. Girls may eat at the restaurant tables luncheons brought from home. Large toilet rooms with every convenience are of great advantage to employés of shops lacking these comforts.

The Clinton Street Boarding Home, under Episcopal patronage, occupies two commodious houses and contains fifty-two girls. There are reading and sewing rooms, a parlor, and six bath rooms, all on a more luxurious scale than in the Arch Street Home. The charge for board is $3 per week in advance, and this charge includes washing, ironing, and medical attendance when necessary. Applicants over twenty-five years of age are not accepted without the express consent of the managers. No limit is fixed as to the earnings of residents, who are mainly students designing to become self-supporting, milliners, dressmakers, saleswomen, bookkeepers, typewriters, and clerks. Religious services occur daily, but attendance upon them is optional. Roman Catholics are not received. Through an endowment fund medicine and nursing are supplied during illness, and girls in ill health or broken down by overwork are sent to the sea shore. Those who from illness or want of employment are unable to pay board are supported for the time.

The Temporary Home for Working Girls, on Fifth street, shelters convalescents out of hospitals, girls discharged or laid off, etc. Fees for board are required in most cases, though remitted at discretion. Three weeks' stay is allowed, and good reasons must be given for exceeding that limit. The house is always full.

The Girls' Friendly Society has active branches in Philadelphia.

The New Century Guild of Working Women was founded for the improvement and recreation of working girls. The guild has a distinct organization and accomplishes the ends reached in New York by the Association of Working Girls' Societies, to which it formerly belonged. The yearly dues of the guild are $1, while hundreds of girls, not members, attend the evening classes, paying from 3 cents to 10 cents for the lessons. Over sixty different occupations are represented among the pupils. Instruction is given in many departments of useful knowledge, including the common English branches, millinery, dressmaking, embroidering, home elocution, home singing, stenography, typewriting, bookkeeping, English literature, German, and French. A labor exchange has been organized where the products of women's work are

sold. Another enterprise of the guild is the preparation of special food for invalids. Still another is a mending department, where darning, patching, etc., are done for the public. A gymnasium for women and children has also been established, where instruction is given by a professional lady teacher in such exercises as are prescribed by a physician who examines all pupils. A department of peripatetic house work has been instituted, through which accredited persons are sent to families by the day or hour to sweep, dust, and do chamber work. Menders, competent to repair anything from stockings to lace, are also furnished to families by the day or hour. The "Once-a-day Club," an inside organization, secures signatures among the girls to the following pledge: "I promise to try to do each day some one service, however small, for some one person whom I am under no obligation to serve." The rooms of the guild, in Girard street, are accessible to girls from many of the largest shops. Branches have also been established in the vicinity of the mills and factories. Seven hundred and twenty women are enrolled in the sixteen classes, exclusive of four guild circles for study, fortnightly lectures, and gymnasium instruction. No vacation fund exists, but one wealthy patroness, who owns a beautiful country home, invites a number of girls in succession to visit her. The committee on statistics of women's work publishes in the newspapers reports of the good things done by proprietors of mills, factories, and shops for the benefit of their emplòyés, deeming that the public acknowledgment of good actions has a greater moral effect than the exposure of cases of oppression. The guild desires to found what might be called a trades college for women, a place where women may learn such trades as they are capable of following.

Providence.—The Women's Christian Association owns a large house in an agreeable locality, wherein it supports an excellent boarding home. The use of the building and the cost of fuel and gas are given by the association, all other expenses being met by the receipts from board. The price of board without room is $3 per week, one-third of this charge being remitted to those who can not return to midday dinner. Double rooms cost $2 per week; single rooms, 75 cents to 87 cents per week. Where earnings are small, reductions are made from these charges, and only the directress knows what each girl pays. Only well recommended Protestants are accepted as residents. Among the boarders are bookkeepers, typewriters, students, milliners, saleswomen, dressmakers, and tailoresses. Two large, pleasant parlors and a reception room are lighted and open every evening, and here the young women receive their friends.

Grace Memorial Home for Little Children is situated in the heart of the factory district. In this lovely home children from ten months to seven years of age, whose mothers work in the mills and are respectable, are received into the nursery or kindergarten, and are cared for and furnished with two good meals a day for 5 cents for one or 8 cents

for two. The number of children thus left varies from thirty to forty-five. The existence of such a place is a great boon to burdened mothers who must earn in the factory the bread with which they and their little ones are fed.

Richmond.—The home of the Women's Christian Association, on Main street, offers its advantages to working girls who have no family ties in the city. The home is not sectarian, girls of all creeds being received. The charge for board (without washing) is $2 per week, and when visited there were fourteen young women living there. The demand for accommodations has become so great that one parlor has been converted into a sleeping apartment. The headquarters of the association are at the home, where entertainments, lectures, and classes are held in which all members may participate. The membership dues are $1 per year.

Saint Louis.—The Women's Christian Association of Saint Louis supplies a Christian home for self-supporting working women. The building containing the home and offices is spacious, admirably ventilated, and very neat; its belongings such as accompany refined living. The average number of boarders during the year 1887 was sixty-five, and the price of board, without washing, varies from $3.25 to $6 per week. The bed rooms are tempered from the halls, a small charge being made for extra fires. The house has two large parlors and a pleasant library for the use of the boarders. Roman Catholics as well as Protestants are received on presenting written testimonials as to character. As in most of the working women's homes, no factory or mill girls reside here, the rates for board being practically prohibitory to the low-paid class whose situation most demands amelioration. Saleswomen, sewing girls, milliners, dressmakers, clerks, and teachers are most numerous among the residents of the home.

The employment committee endeavors to secure positions for those of the boarders who are thrown out of employment. No one out of work is allowed to enter the home.

The Women's Training School, managed by the association, constitutes another important branch of its work. It has a cooking department, with classes for ladies and for girls employed in families, and a dressmaking department, where instruction is given under a competent teacher, and where work is done for patrons, as in any regular dressmaking establishment. Day and night classes in stenography and typewriting are also conducted at the school with success, the average attendance during 1887 being, for the day classes, forty, and for the night classes forty-five pupils. The lunch room for industrial women is among the most flourishing features of the training school's work. Good, substantial lunches are neatly and quietly served to working women at from 5 cents to 15 cents each, and the general air of the dining room is that of genuine home comfort and refinement. The average number of lunches furnished has constantly increased until during the latter part of 1887 it reached 330 a day, or over 7,500 a month. A department has

recently been opened which provides for the training of girls in general housework, including cooking lessons. Girls remaining under this instruction until they are qualified for domestic service receive certificates from the committee in charge and are assisted in securing situations. The employés of the training school reside in the building, which is large and well suited to its purpose. Another feature of the work of the Women's Christian Association is that of its protective committee. It is made the duty of this committee "to afford all necessary aid to industrial women, securing to and protecting them in all their legal rights, whether affecting their persons or property."

The Working Women's Home, No. 1427 North Twelfth street, provides a temporary refuge for respectable women out of employment, and aids them to secure positions. It also cares for those disabled by disease, yet not ill enough to be received at the hospitals. Convalescents from the hospitals are admitted and allowed to remain until strength is restored and situations are secured. The price of board varies from $2.10 to $2.50 per week. Worthy women who can not pay are not refused admission, nor are arrears of board demanded from such ex-residents as have secured poorly paid positions. The home has accommodations for about thirty boarders. Any respectable woman may obtain a night's lodging here for 15 cents, breakfast for 5 cents, dinner for 10 cents. The building is not in the manufacturing quarter of the city.

Saint Paul.—In a new, overflowing community like Saint Paul, where scarcely a vacant residence is to be seen, and where houses are engaged months before they are completed, and often before a brick is laid, the scarcity of suitable boarding places for working women is most apparent, the problem of securing them most difficult. About four years ago a number of prominent citizens of Saint Paul determined that something must be done to benefit the condition of working girls in this direction, and through their efforts was established Mitford Home, in St. Peter street, one of the best homes of its kind in the United States. Those who enjoy its benefits are not objects of charity, but obtain at the smallest cost the essentials of a pleasant home. The price of board is $3 per week, and except as to rent the enterprise is self sustaining through the receipts from this source. Applicants without money are not refused admission to the home if they intend to work; and in such cases the lady managers obtain situations for the girls. Each of the large, airy bed rooms contains from one to three single beds, with bureau, washstand, and closet space for each inmate. The whole dwelling is lighted by gas and heated by furnace. The food is palatable and neatly served. Medical attendance and nursing are furnished free to the residents. The only extra charge made is for laundry privileges. The rules are not stringent, the only requirement in addition to that of general ladylike behavior being that residents shall be in the home by 10 o'clock p.

receive their friends, a piano, the daily papers, magazines, and a growing library. The home will accommodate about thirty-five girls and is always full. Several factory girls live here, and for the use of such the home was really designed, but others holding positions which would enable them to live at good boarding houses come for economy to this home. The directors have under consideration a proposition to limit admission to those earning $6 per week or less. Domestic servants are not received in this home.

Miss Jessie A. Schley, the originator and manager of the Young Girls' Home, began her work about four years ago with a capital of $125. With this sum at her disposal she rented the half of a large double house, bought a few necessary articles of furniture, and put notices in the city papers of the objects of the home. The house was soon filled to overflowing by working girls, making it necessary to rent the other half of the house. This, too, soon became crowded, and alterations in the house were rendered imperative to accommodate the increasing population. With this view the house was bought, and Miss Schley had the home incorporated under the laws of Minnesota. The extensions and alterations were made as contemplated, and the property is now worth $25,000, but not entirely paid for. Though its founders are Roman Catholics and it has been helped by the Catholic Church, the institution is not sectarian so far as admission is concerned, and more than half of its sixty inmates are Protestants, the only religious requirement being attendance at night prayer. The charge for board in this home is $2.50 per week, and the house is filled mainly by factory girls, a few clerks and domestic servants being among the inmates. While more money might be profitably spent on the bed rooms, dining room and bath rooms, in its social features the house is bright and cheery and the occupants are very happy. Every evening dancing goes on in the big parlor and several times during the winter the girls are allowed to entertain their friends at dancing parties, at which refreshments are served. A literary club of forty members, including young men properly introduced, meets every fortnight and presents a programme consisting of music, recitations, readings, etc. One of the rules of the society is that no one can become a member unless competent to contribute to the entertainment of the others, and as a consequence there are no drones among the members. Ten marriages have been celebrated at the home, and on such occasions a wedding breakfast is tendered the bride and groom by the institution. During the four years of its existence the home has received 1,189 persons, and among them only 58 married or elderly persons, the rule being to receive none over thirty years of age, and no widows or divorced persons.

St. Mary's Home, on Somerset street, is maintained by a Roman Catholic order devoted to useful works. Though only recently established the home contains ten girls. The rate of board is graded according to the earnings of the inmates, running as low as $1.50 per

week in some cases. Some girls who do not pay full board assist in the housework. The residents are genteel and seem very well contented with their surroundings.

San Francisco.—The Young Women's Christian Association enumerates among its objects:

(1) To establish an industrial department to provide employment for destitute women; also, a reading room and library for girls and women.

(2) To seek out young women residing in this city, or on arriving here friendless and homeless, needing advice, sympathy, or temporal aid, to extend to them the hand of encouragement, to surround them with moral and religious influences, to aid them in the selection of suitable boarding places and proper employment.

The headquarters of the association are at 912 Sutter street, and from the annual report for the year 1887 it appears that a portion of the building is used as a home for girls or women seeking employment or prosecuting studies in San Francisco. No facts are given in the report as to the number of inmates or the rates for board, etc.

At No. 714 Bush street, is the office of the San Francisco Girls' Union, the object of which is to provide a home for honest, respectable girls who are seeking work. The house at present does not accommodate more than thirty girls at any one time, but the managers are making efforts to enlarge the institution, and it is expected that accommodations for a much larger number of girls will be secured. Even with its present accommodations the union is capable of, and is doing, much good. Employers of female labor know that here may be obtained honest, respectable help, and the girls, as a rule, are not obliged to wait any great length of time before securing positions. When they have found situations they leave the home and other girls are received in their stead. Girls coming to San Francisco from the surrounding country, or from the East, are taken into the home and housed and fed until they are employed. If able, they pay a small sum for board; if without money, they are kept free.

The objects of the Home and Night Refuge for Girls, No. 218 Grove street, will appear from the following statement of the superintendent:

There are many girls always coming to a large city who find themselves without money through no fault of their own. Before this home was opened there was no place to take such girls except to the city prison. Many bad places were open to them and they were subject to the worst kinds of temptation. Now such girls come to us. One primary object is to take only those who are completely destitute, and provide them with shelter and food until they find work. But we expect after a while to enlarge our scope and take girls of all kinds, whether completely destitute or not, and help them to find work and help themselves.

CHAPTER III.

TOPICAL ANALYSIS OF TABLES.

CHAPTER III.

TOPICAL ANALYSIS OF TABLES.

The tabulation of the schedules returned for this investigation resulted in fourteen general tables, with the following titles:

TABLE I.—Present age, by industries.
III.—Age at beginning work, by industries.
VI.—Years in present occupation, by industries.
VIII.—State or country of birth, by industries.
X.—State or country of birth of parents, by industries.
XII.—Conjugal condition, and number of previous occupations, by industries.
XIV.—Conditions of residence, by industries.
XVI.—Certain conditions relating to the families of working women, by industries.
XVIII.—Condition of health, by industries.
XXI.—Certain conditions of working women with both parents native-born, by industries.
XXIII.—Certain conditions of working women with one parent native-born and one foreign-born, by industries.
XXV.—Certain conditions of working women with both parents foreign-born, by industries.
XXVIII.—Classified yearly earnings (of those reporting earnings), with lost time, by industries.
XXXI.—Yearly income and expenses (of those reporting both), by industries and occupations.

Each of the foregoing tables is followed by one or more summaries, either by cities or by industries, or both, as the case may be, each bearing a separate number. All these tables constitute Chapter IV. The facts for all the cities investigated are given by cities in alphabetical order under each tabular title. These various tables will be taken up separately and under their appropriate topics. It should be remembered, however, that they relate simply to the number of women contributing information for this report, as already explained in the introduction. They in no wise relate to the whole number of working women in any city. It is believed that those who have contributed are representative of their class, and every indication points to this conclusion. When, therefore, 936 women are spoken of as "working women of Baltimore," it must not be considered that 936 constitute the whole number of working women in that city, but only that that number is represented in this report from that city, and the total often used, 17,427, represents the entire number from the twenty-two cities involved from whom the information was gained upon which this report is based.

PRESENT AGE.

The fact is clearly shown by Table I, the summary of which is given on pages 118 and 119, that the working women in our great cities are practically girls. The average age in all the cities comprehended is twenty-two years and seven months. The highest average age is to be found in the city of Charleston, S. C., it being for that place twenty-five years and one month. The lowest average age is to be found in the city of Chicago, Ill., it there being twenty years and eight months. It is probable that this variation could be accounted for by the difference in the occupations prevailing in the two places. In Charleston they are not given to manufactures, the women employed in that city being engaged in stores and as milliners, dressmakers, etc., while Chicago, with its mechanical industries, attracts to it girls from the country and those who are willing to work without regard to the name of their employment; it is an active manufacturing city, and one naturally finds younger people employed there than in the stated occupations of Charleston. This variation from twenty years and eight months to twenty-five years and one month is not a great variation, but the condition as to age in each city is more thoroughly shown by an examination of the total number of women involved under each age as classified. It will be found that the concentration is greatest at the age of eighteen, there being 1,569 eighteen years of age, while in the range from fourteen to twenty-five, inclusive, are found nearly 75 per cent. of the whole number of women included in the table. After twenty-five the number drops rapidly, and decreases quite regularly to the end of the table, there being only 267 over forty-eight years of age, and only 65 out of the whole number whose ages were not known. Practically, it is seen, then, that the working women of the cities named are entitled to their popular designation of "working girls." A deeper study than that possible to be carried on here might show that this rapid decrease of numbers employed after twenty-five years of age is due to the encouragement which employment gives to marriage. A woman who is willing to work honestly and faithfully, even at low wages, that she may be able to support herself, has certainly a better chance of securing a home suited to her station in life than the one who prefers to be supported by her friends. The observations of the agents of the Department certainly indicate that such is the case, but it can not be stated as a statistical fact.

The question may be asked as to the representative character of the women furnishing information for this investigation, as illustrated by the ages. Of course, there has been no general investigation with which the present one can be compared; but in 1883 the Massachusetts Bureau of Statistics of Labor conducted an investigation in the city of Boston, similar to the present one, comprehending 1,032 women. The average age of the women met with in that investigation was twenty-four years and nine months. The present investigation, involving 1,406 women in

the city of Boston, shows an average age of twenty-four years and five months. These two investigations being carried on at two different times, four or five years apart, and by entirely different agents, offer a satisfactory piece of evidence as to the representative character of the women interviewed.

AGE AT BEGINNING WORK.

We find on consulting the summary by cities, on pages 178 and 179, that the average age at beginning work is fifteen years and four months. There is not much variation from this average in any of the cities considered, the highest being eighteen years and seven months, in Charleston, S. C., and the lowest being fourteen years and seven months, in Newark, N. J. The character of the industries carried on in these places will probably account for the variation. It is gratifying to learn that but very few begin their work at a tender age, the largest number out of the whole being 3,503 beginning work at fourteen; at thirteen the number drops to 2,502; at twelve to 1,388; then a great change, to only 464 at eleven years of age; 337 at ten, and 126 at nine. The reader can study the variation of ages by industries by using the summary on pages 158 to 177.

YEARS IN PRESENT OCCUPATION.

From the summary of Table VI, on pages 220 and 221, it is seen that the average period during which the women have been engaged in their present occupations is four years nine and two-tenths months. Studied in connection with Table XIII (the summary of Table XII), which is found on page 325, it will be seen that out of the 17,427 women involved, 9,540 have had no previous occupations; that is, these are engaged in their first trial at earning their own living, while 5,508 had been engaged in only one occupation prior to the present one; 1,765 had had experience in two previous occupations, 457 in three, 113 in four, 32 in five, and only 12 in six previous occupations. We found that a majority, nearly 75 per cent., of all the women comprehended were between the ages of fourteen and twenty-five, inclusive, a range of twelve years. A very large percentage, as shown by Table VII (the summary of Table VI), the one under consideration, have been only a short time in their present occupations, 2,735 having been engaged under one year, 2,687 one and under two years, 1,986 two and under three years, 1,724 three and under four years, 1,593 four and under five years, 1,442 five and under six years, 1,166 six and under seven years, and then the figures drop suddenly and decrease rapidly to the end of the table, showing that after the average, less than five years, the great majority drop out of their work.

BIRTHPLACE.

Of the 17,427 women interviewed, 14,120 are native-born and 3,300 are foreign-born, the birthplaces of 7 not being known. The summary

of Table VIII, on pages 248 and 249, gives the details for each city as to the state or country of birth. In the foreign-born, Ireland is most largely represented, having 926, and Germany is next, with 775.

BIRTHPLACE OF PARENTS.

While a very large proportion, 14,120 out of 17,427, of the women involved in this investigation are native-born, 12,904 had foreign-born fathers and 12,406 foreign-born mothers. [For details see Tables X and XI, pages 250 to 303.]

CONJUGAL CONDITION AND NUMBER OF PREVIOUS OCCUPATIONS.

A great majority of the women comprehended are single, the number being 15,387; only 745 are married, and 1,038 widowed. The working women, then, as a rule, are single women, fighting their industrial fight until other conditions shall release them from it. They are not only supporting themselves, but giving their earnings largely to the support of others at home, and assisting in the housework.

In Table XII, showing conditions, is also a section showing previous occupations. Brought to a city summary these facts are shown by Table XIII, on page 325. By referring to it it will be seen that a very large number, 9,540, were engaged in their first attempt at earning a living, while 5,508 had had experience in one previous occupation, and 1,765 in two previous occupations. These facts clearly show that the women have not been changing much from one occupation to another, but have been fairly steady in their callings.

CONDITIONS OF RESIDENCE.

The home surroundings and conditions of the working women offer an interesting and valuable study By the summary of Table XIV, to be found on page 350, it will be seen that of the total number of women (17,427) considered, 9,813 not only work at their regular occupations but assist in the housework at home, while 5,105 do not assist in housework, the total number living at home being 14,918; that is to say, a very large proportion of the working women in our great cities are under home influences. Whatever those influences are, the women are under them. A small proportion (only 709) live in boarding houses; 184 only out of the whole number find their homes in lodging houses, while 1,616 live in private families. The number, then, directly and indirectly under home influences, consists of those who live at home (14,918) and those who live in private families (1,616); so that out of 17,427, 16,534 (or nearly 95 per cent. of the whole) are directly and indirectly under home influences and living with home surroundings. More than half of the whole (8,754) give their earnings to the home life. They contribute to the general support. Four thousand two hundred and sixty-seven pay board at their own homes, only 701 receiving board at the hands of

their families. One thousand one hundred and ninety-six hold various relations to their families.

THE FAMILIES OF WORKING WOMEN.

The report relates to 13,355 families. The average number of persons in a family, with the number of workers and those owning houses, is shown for each city in Table XVII, on page 368. The whole number of families, as such, reported (13,355, as already stated) represents 70,121 persons, or an average of 5.25 persons to the family. Each of these families had on an average 2.78 persons engaged as workers—that is, the 5.25 persons to each family were supported by 2.78 persons at work. This fact has a marked influence on the rate of wages and the possible earnings of working women, and will be referred to when earnings and expenses are considered.

It is gratifying to note that of the whole number of families reporting (13,355), some member of the family, to the number of 2,470, owns the house in which the family resides.

The facts stated in this table do not cover the cities of San Francisco and San José, Cal. The averages, however, for the different cities do not vary greatly, and this fact indicates that the condition which exists in one practically exists in all of the cities.

HEALTH CONDITION.

Table XVIII illustrates the condition of health, by industries, and is followed by a summary (Table XIX, on pages 387 to 391) by industries, and a summary for all the cities (Table XX, on page 392). The total number of working women interviewed (17,427) reported their health conditions at the time they commenced work. Of this number, 16,360, at that time, were in good health, 882 in fair health, and 185 in bad health. The changes in health condition from that existing at the time of beginning work to the present condition is illustrated by the fact that 14,557 are now in good health, instead of 16,360; while 2,385 are in fair health, instead of 882, and 485 are in bad health at the present time, instead of 185 in bad health when they began their employment. The table discloses no particular facts relative to different cities, the changes being quite as likely to occur in one city as another.

A study of the table relating to health condition, by industries, does not disclose any remarkable facts.

EDUCATION, CHURCH ATTENDANCE, HOME AND SHOP CONDITIONS.

These interesting features attending the lives of working women are brought out by a series of tables beginning with Table XXI and ending with Table XXVII. The summary to the first is Table XXII, on pages 420 and 421, and relates to the conditions specified of those women having both parents native-born. The total native-born working women

out of the whole number investigated we have seen, by the table on birthplace, to have been 14,120. Of this number 3,732, having both their parents native-born, made reports relating to their education, church attendance, etc.; 2,828 were educated in American public schools, while 697 were educated in other schools, 207 not reporting their school work, and of these 62 in American public schools, 105 in other schools, and 68 in schools not reported, were found by actual test to be unable to read simple sentences; 2,214 of those having both parents native-born are in the habit of attending Protestant churches, 644 are attendants upon Roman Catholic churches, while a large number, 753, do not attend church at all. Of this class of which we are speaking, 2,779 have comfortable home conditions, and 953 poor home conditions, while 3,433 appear to be well cared for in their working places, and 299 are neglected in such conditions.

Referring now to the next table in the group, we find it relates to those working women having one parent native-born and one foreign-born. The number coming under this classification is quite small, being but 1,566. A large proportion, 1,149, of this mixed class were educated in American public schools, 357 in other schools, and only 60 in schools not reported, and of these 9 in American public schools, 22 in other schools, and 15 in schools not reported, were found to be unable to read; 608 are attendants upon Protestant churches, 674 upon Roman Catholic churches, and 237 do not attend church at all; 1,175 have comfortable home surroundings, while 391 have poor home conditions. A very large proportion, 1,448 out of 1,566, are well cared for in their workshop conditions, and only 118 are neglected.

Taking up those who have both parents foreign-born, we find the number quite large, it being 11,415 out of the 17,427 women comprehended in the report, although 14,120 of the whole number were native-born. Of this number having both parents foreign-born, 6,479 were educated in American public schools, 4,321 in other schools, and 615 in schools not reported, and of these numbers 74 in American public schools, 335 in other schools, and 257 in schools not reported, were unable to read; 3,032 attend upon Protestant churches, 6,451 upon Roman Catholic churches, and 348 upon the Hebrew, while 1,319 do not attend church at all; 8,066 have comfortable home conditions, and 3,349 poor home conditions; 10,085 were well cared for by their employers, and 1,330 were neglected under such conditions.

Aggregating the whole, as has been done by a table (XXVII, pages 482 and 483), summarizing the school, church, home, and shop conditions for all, that is, for those having both native and foreign parentage combined, we find the facts reported for 16,713 women relating to these conditions. Of this number 10,456 were educated in American public schools, 5,375 in other schools, and 882 did not report their educational facilities, and of these 145 in American public schools, 462 in other schools, and 340 in schools not reported were found to be unable to

read; 5,854 attend Protestant churches, 7,769 the Roman Catholic, and 369 the Hebrew, while a very large percentage, and one that is to be regretted, comprehending 2,309, do not attend church at all. In home conditions, 12,020 are reported as comfortable, while of 4,693 it is stated that their home conditions are poor, and "poor" in this investigation means poor indeed. In the shop conditions, however, a better state of affairs exists, for 14,966 are well cared for, and 1,747 are neglected in such conditions.

This group of tables is worthy the attention of all philanthropists, whether engaged in educational work, church work, or interested in the home and shop surroundings of the people who are obliged to work with their hands to gain their livelihood.

EARNINGS AND LOST TIME.

We have learned, so far as statistics can teach us, the facts relating to the ages and the occupations, the birthplace, the conjugal conditions, and the conditions of residence which surround the working women of our great cities. We have also seen the proportion of the women considered in this investigation that live at home, that assist in housework, and that give their earnings to their families. The church, the home, and the shop conditions have also been stated. All these matters pertain to the social and moral side of the investigation, but the economic consideration becomes all-important. On what earnings can all the things we have been considering be sustained, and what part of the earnings of the women does it take to sustain themselves? By consulting the table entitled "Classified yearly earnings, with lost time," we find an answer. This table is given as Table XXVIII, and is found on pages 484 to 519, in which all the details as to industries are shown. It is only necessary, however, to consider the summaries drawn from this table. They will be found as Table XXIX, giving the yearly earnings by industries, and Table XXX, giving yearly earnings by cities. These summaries, whether by industries or by cities, deal both with classified earnings and with average earnings of the number of women reporting, the classified earnings being given as from $100 to $500 and over. This method is much more satisfactory than the "average" method, although for the great body of people, and for economic purposes, the "average" method is probably satisfactory; but for sociological purposes the classified statement of earnings is a necessity. Under the classification we find that 373 earn less than $100 per annum, and that this class lost an average of 86.5 days for the year covered. The largest number (2,647) earn $200 and under $250 per annum, losing, on an average, 37.8 days in the year; 2,377 earn from $250 to $300, losing 31.5 days. As earnings increase, naturally the lost time decreases, as, for instance, 398 earn from $450 to $500 a year, and this class lost but 18.8 days. The total number reporting their earnings was 13,822, and the average time lost was 36 days per year. These

earnings are actual earnings, and are not statements derived from any computation based on the rates of wages. The concentration, it will be seen by consulting the tables, comes on earnings ranging from $150 per year to $350. The averages for the various cities fully illustrate the integrity of the work of the agents, and show the representative character of the women interviewed. It is well, perhaps, to consider these actual earnings as distributed over the whole year, bringing the results to average weekly earnings. The yearly earnings, as stated, being the actual earnings for the whole year, the weekly earnings are easily obtained by dividing the total for the year by 52. This is perfectly fair, under the circumstances, because the lost time results in a loss of earnings, and the consideration of average weekly earnings is the result simply of distribution in each case. The following table shows for each city the actual average weekly earnings:

AVERAGE WEEKLY EARNINGS, BY CITIES.

Cities.	Average weekly earnings.	Cities.	Average weekly earnings.
Atlanta	$4.05	New Orleans	$4.31
Baltimore	4.18	New York	5.85
Boston	5.64	Philadelphia	5.34
Brooklyn	5.76	Providence	5.51
Buffalo	4.27	Richmond	3.93
Charleston	4.22	Saint Louis	5.19
Chicago	5.74	Saint Paul	6.02
Cincinnati	4.59	San Francisco	6.91
Cleveland	4.63	San José	6.11
Indianapolis	4.67	Savannah	4.99
Louisville	4.51		
Newark	5.10	All cities	5.24

The average for all the cities named, considered as a whole, is $5.24, and it is on this average, which must stand as the representative weekly earnings of the working women in the great cities of the country, that these women support themselves, and even a large number contribute to the support of the family, and yet a very large proportion pay for their sewing. It does not appear in the tables, but the facts have been drawn from the returns, that of the total number of women involved in this investigation, 3,702 do their own sewing, 7,111 do their own sewing in part, while 6,614 do none of their own sewing.

This study of average weekly earnings by cities offers some opportunities for statistical verification. Various bureaus of statistics of labor in the country have from time to time and to a certain extent considered the question of women's wages. The first investigation of any magnitude involving this topic was conducted by the Bureau of Statistics of Labor of Massachusetts, in 1883–'84. From the fifteenth annual report of that bureau it is learned that the average weekly earnings of the working women of Boston, as represented by the returns, was $4.91, as against $5.64, shown under the present investigation. In the city of New York, under an investigation conducted by the Bureau of Labor

Statistics of the state of New York, in 1884, (*a*) into the condition, wages, etc., of the working women of the city of New York, it was shown that the average weekly earnings of nearly 11,000 women were $5.53, while in the present investigation it will be seen by the short table just given the earnings for the city of New York are $5.85. In the city of Chicago, as shown by an investigation conducted by the Bureau of Labor Statistics of the state of Illinois, in 1886, (*b*) the average weekly earnings of 2,086 women in various industries were $5.73, while in the investigation under consideration the earnings of the women interviewed in the city of Chicago average $5.74. In San Francisco the average weekly earnings, as shown by the present investigation, are $6.91, while by the report of the Bureau of Labor Statistics of California for the years 1887–'88 (*c*) it is shown that the average is $6.36. This statement is amply borne out for San Francisco by the preceding report of the California bureau (the second). Boston, Chicago, New York, and San Francisco are the only cities for which specific comparisons can be made, and these comparisons prove beyond a doubt not only the representative character of the present report, but its integrity; that is, it shows conclusively that the representative class has been reached. The facts, however, are borne out in a general way by the reports of various states, notably Colorado, for in the first biennial report of the Bureau of Labor Statistics of that state occurs the following statement: "Legitimate calculations lead to the certainty that the wages of a large majority of the female employés in Denver will not exceed $6 per week." In the second biennial report of the Bureau of Labor Statistics of Iowa the commissioner states that the returns of average wages paid to women in forty-eight establishments indicate an average of $4.33 per week. The Commissioner of Labor for the state of Ohio, in his eighth annual report, for the year 1884, makes a comparative statement, which shows the wages per week of females above fifteen years, for 1880, as $5.59, and for 1884, as $5.98, and in other portions of the same report occur corroborating figures. The Commissioner of Labor for Connecticut, in the second annual report of the Bureau of Labor Statistics of that state, for 1886, gives an instructive table relating to the employment and wages of women in twenty-seven establishments in New Haven. This table relates to women working in metal, wearing apparel, miscellaneous manufactures, stores, and other industries, the total being 2,858. and the average weekly wages being $6.54. The Commissioner of Labor for the state of Michigan, in his first annual report, for 1884, gives the average weekly earnings of 503 women employed in various industries at $4.68; this for the city of Detroit. The Commissioner of Labor for the same state, in his third annual report, that for 1886, gives the average weekly wages of 7,668 women, employed in fifty-two towns and cities, as $5.49, and the statements of

a See Third Annual Report of the Bureau of Statistics of Labor of New York.
b See Fourth Biennial Report of the Bureau of Labor Statistics of Illinois.
c See Third Biennial Report of the Bureau of Labor Statistics of California.

the two reports are well borne out by those in the second annual report of the Commissioner of Labor of the state of Michigan. The facts reported by the Commissioner of Labor of the state of Rhode Island, in his first annual report, for the year 1887, as well as those reported by the Commissioner of Labor for the state of North Carolina, in his first annual report, that for 1887, offer corroborating evidence as to weekly earnings of the class of women considered, and like evidence is to be found in the reports of the New Jersey Bureau of Statistics of Labor and Industries, and in the reports of the chief of the Bureau of Industrial Statistics of Pennsylvania.

Much is heard at the present time of the very low wages paid working women. It must be clear that they do not rise, on the average, above $5 per week, or $5.24 as indicated by this report. The summary by cities, Table XXX, on pages 530 and 531, would seem to indicate that the majority are in receipt of fair wages, when the whole body of working women is considered; but 373 earn less than $100 a year, and quite a large number (1,212) earn from $100 to $150 a year, that is, the earnings of these women, distributed by weeks over the whole year, do not amount to more than $2 or $3 per week. These are the great exceptions, but the figures tell a sad story, and one is forced to ask how women can live on such earnings.

An examination of earnings by industries is perhaps more suggestive than that of earnings by cities, but the table showing this, that is, Table XXIX, on pages 520 to 529, is in itself an analysis of the subject, and the student must consult its pages.

INCOME AND EXPENSES.

It is only from the most intelligent that facts regarding both income and expenses can be secured. Table XXXI, on pages 532 to 624, shows these items for 5,716, arranged by industries and occupations for each city, while Table XXXII, on page 625, shows these facts by cities, without regard to industries. In this table a very few highly paid women, working in semi-professional pursuits, have inadvertently found a place, but not to a sufficient number to affect the general result. The women giving the facts on which this table of income and expenses has been constructed as a rule receive higher pay than the whole body of women from whom returns were received, and this is because, as already intimated, the women who can give both income and expenses with any degree of accuracy are the most intelligent and, as a rule, the most highly paid. This variation, however, is not great. The total number giving earnings only, as shown in Table XXVIII, was 13,822, the average yearly earnings for all the cities contemplated being $272.45, or a weekly average of $5.24. The women giving the facts for the income and expenses table (XXXI) received, from their regular occupations, on an average $295.54 per year, or a weekly average, distributing their year's earnings over the whole year, of $5.68 per week.

Of the total number of women giving income and expenses, 682 received an income from other sources than their regular occupations, but only an average of $40 per year for the number reporting such incomes. The expenses of these women were, for room and meals, $162.06 per year. This is 57 per cent. of their total expenses, the total expenses being, on an average, $286.32. For clothing they expended, on an average, $79.06, which is 28 per cent. of the total expenses. The science of statistics is well exemplified by these figures, when taken in comparison with those obtained in a like investigation in the city of Boston a few years ago, already referred to. In that investigation the board and lodging of the women exhausted 63 per cent. of the whole yearly expenses, and clothing 25 per cent. of the whole yearly expenses, or a total for these two items alone of 88 per cent. for the city of Boston in 1883. In this investigation, taking all the cities into consideration, we find they expended 57 per cent. for board and lodging, and 28 per cent. for clothing. Another piece of evidence of the value of statistics is to be found in the margin between expenses and income. In the present investigation the margin is $9.22 per year, while in the Boston investigation of 1883 (*a*) it was $7.77. To bring the comparison into closer relations the Boston investigation of 1883 should be compared with the Boston investigation now under consideration. The margin of earnings over expenses in the 1883 investigation was, as stated, $7.77; the margin in Boston, under the present investigation, $6.45. The amount expended, according to the present investigation, in Boston, for board and lodging, was 58 per cent. of the total expenses, and for clothing 25 per cent. These percentages illustrate further the scientific nature of the investigation when it is known that they agree with the law laid down by Dr. Engel, of Prussia, as to the percentages of expense belonging to subsistence, clothing, etc., which law has been fully corroborated by the investigations of various bureaus in the United States. Of the number of women giving facts for this table of income and expenses, 563 expended $72.35, on the average, for dependents, while the whole number involved (5,716) expended an average of $38.08 per annum for other general expenses, besides those for board and lodging, and clothing.

In considering the last two topics, the yearly earnings, and the income and expenses of working women, it has been shown that all their expenses must be met within the range of the average weekly earnings, $5.24. The question constantly suggests itself, whether this represents a fair wage or not. If not, if it is too low, why is it so low? Why can not women earn a larger sum per week or per annum than that shown by the statistics given? What are the influences which keep earnings at so low a point? Are they really low earnings, or is it simply an appearance? It is quite clear, from the various investigations that have been made, that there is little, if any, improvement in the amount of

a See Fifteenth Annual Report Massachusetts Bureau of Statistics of Labor.

earnings which a woman can secure by working in the industries open to her; her earnings seem not only ridiculously low, but dangerously so. While it is not possible to determine an economic law which regulates her earnings, it is possible to consider a few elements which enter into the case. A generation ago women were allowed to enter but few occupations. Now there are hundreds of vocations in which they can find employment. The present report names three hundred and forty-three industries in which women have been found actively engaged. The result of this vast extension of opportunity is the same as under like conditions in other directions. Whenever any industrial operations are simplified to such an extent that the weaker person can perform what was done of old by the stronger one, the cheaper labor comes in, and wages must of necessity be lowered temporarily, whether to the one formerly performing the labor or to the new-comer who undertakes to occupy his place. So, as the adult man in light occupations has given place to the woman or to the young person, wages in specific employments have decreased, as compared with the former wages of the man, but they have vastly increased, as compared with the former wages of the woman or young person. In other words, by the progress or change in industrial conditions the limit to the employment of women has been removed, or at least greatly extended, and their opportunities for earning wages correspondingly increased and the wages themselves greatly enhanced. In so far as women have displaced men, they have taken advantage of opportunities which were not open to them before such displacement. They could only displace men because they were willing to work for less wages. Now the working women find themselves in the condition of new elements of labor, and no action can be taken which will increase abnormally their earnings, for they are now earning something where formerly they could earn little or nothing. For an increase in wages, certainly a most desirable result to be gained, women must depend upon industrial and economic conditions, and not upon legislative enactment, or even upon concerted actions of persons charitably and benevolently disposed. They contribute largely now to the support of the family. Formerly they were the subjects of expense to a considerable degree. As we have seen, so far as the women involved in this investigation are concerned, there were 2.78 persons earners in each family. Not all this number of earners were women, to be sure, because the earners comprehend the head of the family and all others, but the woman has come in as a factor, and a new economic factor, and as such must take her place at the bottom of the ladder. She will gain step by step as she becomes more valuable as such factor, but the gain will be slow.

Many subordinate causes might be named which keep women's wages at a low rate, but they are not such influences as really shape the rate of wages, except locally, and they are hardly worthy of consideration as leading factors. The question of marriage interferes largely with

women's receiving the wages that are paid to men for like work. The competition coming from the fairly well-to-do is a contributing influence toward keeping wages down. Many girls, living with their fathers and mothers, who are capable of supporting them fairly well, like to be independent of the purse of the father, and so enter some occupation at very low wages, that they may earn their own pin money—a slight influence, it is true, but yet a contributing one. There are many others, equally unimportant in themselves, individually, yet, when taken all together, and with the main features just recited, secure the result so much to be deplored. The lack of thorough training in technical knowledge and of the capacity for close application enters into the whole question. The social standing of working women is becoming better and better, but it has in the past helped to keep her wages down, in a certain sense, and something, perhaps, can be done in this direction. Parents at least can teach their children to respect all honest labor. The honest working woman is entitled to the respect of all honest-minded people. She should be welcomed in the churches of the cities, and should be drawn into the best associations, where social and moral surroundings would aid her in cultivating her own self-respect, and in which mutual assistance could be rendered. At least it should not be possible to class her as the "forgotten woman," for her struggle is too heroic, her hardships too painful, her lot too dreary for Christian people to thoughtlessly pass her by.(*a*)

This leads one to another side of the investigation.

THE CHARACTER OF WORKING WOMEN.

The statistical method is not the best under which to determine moral conditions; yet, as an auxiliary, it has great efficiency. Statistical science can only be employed to show the results of the lives of the people; it can not show the inner motives which lead to results. So, in this investigation relating to working women, it is comparatively easy to determine, through statistics, their home surroundings, their wages and general conditions, their income and expenses, and all that belongs to their material environment. But their characters, as to personal integrity or virtuous conduct, can not well be ascertained through a statistical investigation. Yet it is necessary to consider this side of the question.

Observation is not sufficient, and personal interviews might lead to difficulties greater than those belonging to observation alone. The force of statistics in such conditions is rather negative than positive, and this negative quality is brought into use here.

It is often flippantly asserted that the shop girls, those comprising

a These conclusions, arrived at by the writer in an investigation concerning the working girls of Boston, in 1883, seem all the more forcible to him in considering the results of the present investigation relating to the working women of twenty-two cities instead of but one.

the class under investigation, recruit the ranks of prostitution. It would be a relief, of course, to all honest citizens to have this charge removed entirely, and further, to have the facts warrant its removal. Of course, such a charge can not be entirely removed when applied to any class. The only question here is, Does it apply to the class against which it is brought?

A few statistics of a negative character have been collected, relating to prostitution. This partial investigation has been made as to how far the ranks of prostitution are recruited from girls belonging to the industrial classes. It should be distinctly borne in mind that this partial investigation was applied only to what may be called professional prostitutes; for no statistical investigation can disclose the amount of immoral conduct of any class of people. So that quiet, unobtrusive, and unobserved prostitution, which exists in all communities, has no place in the present consideration.

Original investigation was made in the following cities: Brooklyn, Buffalo, Chicago, Cincinnati, Cleveland, Indianapolis, Louisville, Newark, New Orleans, New York, Philadelphia, Richmond, Saint Louis, and San Francisco.

In 1884 the Massachusetts Bureau of Statistics of Labor made a report as to the previous occupations of one hundred and seventy professional prostitutes in the city of Boston, and the facts then given have been incorporated in this report.

The number of prostitutes as stated in the following table, for any one of the cities named, falls far below the total number of prostitutes in that city, but the number and variety of those from whom information has been received are sufficient to insure representative results. Thus in Chicago, for example, there are, or were at the time of the investigation of the Department, 302 houses of ill-fame, assignation houses, and "rooming" houses, known to the police, containing 1,097 inmates. This investigation involved 557 of this number. In some of the other cities, Philadelphia and Brooklyn notably, the proportion of prostitutes interviewed was not so large as in Chicago, but a sufficient number of reports were obtained to afford a basis for a fair conclusion as to the part played, if any, by the working women in swelling the ranks of these unfortunates.

In certain of the cities in which this subject was investigated return was made of the number of women who had been married before entering on a life of shame. Some of these women were married before engaging in industrial work, some between periods of industrial employment; some after working at various employments were married, and then entered upon a life of prostitution, and some of the married prostitutes had never been industrially employed.

The facts as to marriage are shown by the following brief table, which gives the number of prostitutes furnishing information in the cities re-

ferred to, the number reporting themselves as having been married, and the per cent. of the total number who were married:

City.	Number of prostitutes furnishing information.	Number of prostitutes reported as having been married.	Per cent. of married of total number.
Boston	170	13	7.65
Chicago	557	143	25.67
Cincinnati	382	77	20.16
Louisville	263	70	26.62
New Orleans	167	4	2.40
Philadelphia	100	3	3.00
San Francisco	323	81	25.08

It is hardly worth while to take space at this time to give the occupations of all those who have entered prostitution from the different cities involved.

The number of prostitutes giving information was 3,866, and the following summary exhibits the occupations of this number preceding their entry upon their present life. For this purpose, occupations similar in character have been grouped, and no occupation or group containing less than ten persons has been included in the classification—those numbering under ten being put into the general classification of "various occupations":

Actresses, ballet girls, circus performers, singers, etc	52
Bead-trimming makers, embroiderers, lace workers	21
Bookbinderies	18
Bookkeepers, clerks, copyists, stenographers, typewriters, etc	31
Candy factories	10
Cigarette, cigar, and tobacco factories	78
Corset factories	16
Dressmakers, seamstresses, employés of cloak and shirt factories, button-hole makers, etc	505
Hairdressers and hair workers	15
House work, hotel work, table work, and cooking	1,155
Laundry work	70
Milliners and hat trimmers	71
No previous occupation (home)	1,236
Nurses (hospital and house), and nurse girls	22
Paper box factories	32
Rope and cordage factories	12
Saleswomen and cashiers	126
Shoe factories	43
Students (at schools or convents)	14
Teachers, governesses, etc	23
Telegraph and telephone operators	11
Textile factories	94
Various occupations	211

The following list shows the character of the more important occupations omitted from the foregoing summary, with the number of women who had been employed in each, and which are included under "various occupations":

Artificial flower makers, 9; button factories, 9; farm work, 9; canning establishments, 8; necktie makers, 8; housekeepers, 7; straw sewers, 7; hat and cap factories, 6; bag factories, 5; canvassers, 5; clock and watch factories, 5; box factories (wooden), 4; chewing-gum factories, 4; florists, 4; feather curlers and sewers, 4; restaurant, 4.

The preceding figures are exceedingly instructive. By them it will be seen that the largest number coming from any occupation has been taken from those doing house work, hotel work, and cooking; this number, 1,155, being 29.88 per cent. of the whole number comprehended in the statement.

The next largest number, so far as occupation is concerned, ranks with the seamstresses, including the dressmakers, employés of cloak and shirt factories, etc., this number being 505.

A fact which strikes one sadly is the large number who enter prostitution directly from their homes. This number is 1,236, being 31.97 per cent. of the whole number comprehended.

It can not be said, therefore, so far as this investigation shows, that the employés in workshops are to be burdened with the charge of furnishing the chief source whence the ranks of prostitution are recruited.

The experience of the writer in making an examination in many cities, both in the United States and in Europe, sustains the statement, but more strongly than the figures here given, that working women do not recruit the houses of prostitution.

Nor does the investigation show that employers of labor are guilty of reducing their employés to a condition of prostitution, as is often alleged. Only in the rarest cases can one meet with a whisper that this is the case. And these whispers, followed to their source, have rarely disclosed any facts which would lead to the conclusion that employers make bargains based on the loss of character of their employés.

From all that can be learned one need not hesitate in asserting that the working women of the country are as honest and as virtuous as any class of our citizens.

All the facts are against the idea that they are not virtuous women. The statistics given show that a very large percentage of them are living at home. They are living in whatever moral atmosphere there is in their homes.

And it is true that they are not corrupted by their employers, nor do their employers seek to corrupt them. All such impressions originate in the idea that girls can not dress well upon the small wages they receive unless they lead immoral lives, in which they receive pecuniary assistance. But all the testimony that the writer has ever been able to collect upon this point is against such a sentiment, which prevails in too great a degree. The testimony of capable and honest women—of the heads of departments in great stores and millinery establishments and shops, forewomen of shops, the matrons of homes, and of all those best informed and in the best positions to give testimony on this point—is that the working women are as respectable, as moral, and as virtuous as any class of women in the country.

Of course there are exceptions in this class, as in all, but the grand fact must stand out plainly that the working women are not to be burdened with a charge that belongs to others as well as to them, so far as it lies at all.

Working women are not street-walkers. They could not carry on their daily toil and walk the streets too. A captain of police (*a*) expressed the matter well when he said that people who charge the working women with walking the streets at night for evil purposes do not know what they are talking about. Night-walkers are all of them hardened convicts. The prostitutes, some of them, may have been hard-working women, but no working woman ever walks the streets as a prostitute. This captain said that when a girl falls from virtue she has first to graduate as a "parlor" girl, and then serve some time in a still lower house, before she is hardened enough to take to the streets.

The fact that here and there a case of depravity comes to public attention can not be considered as conclusive evidence that the class to which the depraved case belongs is the cause of the depravity, or that the class itself is depraved.

Virtue and integrity belong to the individual. Either may be stimulated by surroundings, or destroyed by them. But when it is known that women are willing to work from morning till night for the paltry sum of $5 per week, out of which they must, and do, assist their friends, contribute, as a rule, to the general expenses of the household, to a large extent pay for their own sewing, and in various ways help on the family, it can not be assumed, with any reasonableness, that they enter lives of prostitution, even in that private way which it is alleged often accompanies their lives. Certainly the houses of prostitution do not contain them.

Many professional prostitutes, when finding a new acquaintance, are very apt to state that they are saleswomen in this or that well-known house. This attracts the victim, and gives him to understand that he is in company with some half-respectable woman, and not in company with a professional prostitute. His conscience, what little he has left, might rebel at associating with a professional prostitute, when it would allow him to continue in the company of a woman in a respectable calling.

The virtuous character of our working women is all the more attractive when the cost of their virtue is recognized. With their poor pay, if they continue virtuous they are the more entitled to our applause, and certainly one must recognize the heroic struggle they make to sustain life, to appear fairly well, and to remove what every honorable-minded man and woman seeks to remove, the appearance of poverty.

All the helps that are thrown around them in our great cities, all the kindness and the care of benevolent employers, all the influences of church and school, must be increased, and these, joined with the heroic efforts of the women themselves, must gradually deepen their characters, strengthen their purposes, and help them to gain a more generous livelihood.
